Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation Sandhu, Kamaljeet, 2021-06-18 As organizations continue to move towards digital enterprise the need for digital transformation continues to grow especially due to the COVID 19 pandemic These impacts will last far into the future as newer digital technologies continue to be accepted used and developed These digital tools will forever change the face of business and management However on the road to digital enterprise transformation there are many successes difficulties challenges and failures Finding solutions for these issues through strategic thinking and identification of the core issues facing the enterprise is of primary concern This means modernizing management and strategies around the digital workforce and understanding digital business at various levels These key areas of digitalization and global challenges such as those during or derived from the pandemic are new and unique They require new knowledge gained from a deep understanding of complex issues that have been examined and the solutions being discovered Emerging Challenges Solutions and Best Practices for Digital Enterprise Transformation explores the key challenges being faced as businesses undergo digital transformation It provides both solutions and best practices for not only handling and solving these key issues but for becoming successful in digital enterprise This includes topics such as security and privacy in technologies data management information and communication technologies and digital marketing branding and commerce This book is ideal for managers business professionals government researchers students

practitioners stakeholders academicians and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective **Proceedings of the 4th International Conference on Internet Finance and Digital Economy (ICIFDE 2024)** Kun Zhang, Hang Luo, Tang Yao, Hongbo Li, 2024-10-10 This is Open access book The 4th International Conference on Internet Finance and Digital Economy ICIFDE 2024 will be held in Harbin Heilongjiang Province China from August 16th to 18th 2024 This conference advocates the design industrialization strategy to drive the integration and innovation of industry university and research and empowers enterprises to design innovation performance growth financing and listing transformation and upgrading It has a good history of organizing conferences and publishing It aims to provide a platform for experts scholars technicians and entrepreneurs engaged in finance and economy to intersect disciplines integrate industries and share resources We sincerely invite experts and scholars from universities scientific research institutions business people business associations and heads of various departments at home and abroad to participate in the conference and exchange *Digital Transformation* Nirjhar Chakravorti, 2022-06-23 With the advent of digital technologies society is reshaping itself radically In the last decade digital technologies have brought fundamental changes in the industry and business environment The holistic socioeconomic and industrial changes are a result of general purpose technology aspects of digital transformation which are rare and have inherent capabilities of self transformation to bring long term benefits across the entire global business environment After the steam engine electric generator and printing press the recent development of digital transformation has created an opportunity with extensive sustainable and incremental influence for disruption and renovation However the most important difference between digital transformation and the previous general purpose technologies such as steam engines and electric generators is the pace of technology s penetration across the globe To cope with the accelerated speed of global digitization the digital transformation process should be accepted adopted and adapted across society and business utilizing a multi dimensional strategy This book illustrates a strategic structure that covers Digital Challenges for Industries Applicability for Digital Transformation Digital Transformation Framework People and Organization Structure Capability Delivery Activities and Life Cycle Benefits How will businesses embrace digital transformation How will organizations formulate a digital transformation strategy How will they invest in digital technologies To answer these questions a strategic structure is created which can provide guidelines to businesses to create a framework for digital transformation that includes strategy process governance and funding The exponential growth in data capacity storage process and communication due to rapid digitalization has created infinite opportunities and different dimensions to businesses Digital platforms have enabled alternative business models by deconstructing the traditional value chains Agile concepts driven by design thinking have brought innovative perspectives with an environment of boundless disruption To run a company with sustainability and manage disruptions more consciously the adoption of a digital platform with an appropriate strategy is the only viable option

Digital transformation DX goals and strategies should be in line with a company's business objectives. The strategic structure explained in the book is a global framework that can be adopted by any profit or nonprofit organization. Like any other transformational process, digital transformation has created structural tension between old and new. In this tension, employees play a large role, and their clarity of thought regarding the transformation process is of paramount interest. To overcome this tension, companies need to orient as learning organizations which will provide opportunities for growth in an ambidextrous environment embraced with a digital ecosystem. The book explains how the structural tension between old and new can be mitigated by effectively involving all stakeholders in the transformation process. Digital Africa Tania

Begazo, Moussa Blimpo, Mark Dutz, 2023-04-04. All African countries need better and more jobs for their growing populations. Digital Africa: Technological Transformation for Jobs shows that broader use of productivity-enhancing digital technologies by enterprises and households is imperative to generate such jobs, including for lower-skilled people. At the same time, broader use can support not only countries' short-term objective of postpandemic economic recovery but also their vision of economic transformation with more inclusive growth. These outcomes are not automatic, however. Mobile internet availability has increased throughout the continent in recent years, but Africa's uptake gap is the highest in the world. Areas with at least 3G mobile internet service now cover 84 percent of country populations, averaged across Sub-Saharan Africa, but only 22 percent use such services. The average African business lags in the use of smartphones and computers as well as more sophisticated digital technologies that catalyze further productivity gains. Two issues explain the usage gap: the affordability of these new technologies and the willingness to use them. For the 40 percent of Africans below the extreme poverty line, mobile data plans alone would cost one-third of their incomes, in addition to the price of access devices, apps, and electricity. Data plans for small and medium businesses are also more expensive than in other regions. Moreover, shortcomings in the quality of internet services and in the supply of attractive, skill-appropriate apps that promote entrepreneurship and raise earnings dampen people's willingness to use them. For those countries already using these technologies, the development payoffs are significant. New empirical studies for this report add to the rapidly growing evidence that mobile internet availability directly raises enterprise productivity, increases jobs, and reduces poverty across Africa. To realize these and other benefits more widely, Africa's countries must implement complementary and mutually reinforcing policies to strengthen both consumers' ability to pay and willingness to use digital technologies. These interventions must prioritize productive use to generate large numbers of inclusive jobs in a region poised to benefit from a massive youthful workforce, one projected to become the world's largest by the end of this century. **Leading and Managing in the Digital Era** Gregory Prastacos, Nancy Pouloudi, 2024-12-30. Rapidly emerging digital technologies such as artificial intelligence, robotics, the Internet of Things, blockchain, and virtual and augmented reality are driving profound changes in the workplace and society. These technologies are radically transforming areas of cognitive and physical work while opening up new opportunities for complex decision making and increased

efficiency As a result a new set of skills and a new style of leadership is required where digital savviness is essential together with an increased focus on collaboration transparency entrepreneurship diversity and inclusion This book organized in six parts presents key developments of the digital age in leadership management the future of work and business education Part I Governance in the Digital Era sets the scene by reviewing the challenges that the digital era presents for policy makers at national and global levels This research is complemented by research at the organizational level in Part II Strategy and Entrepreneurship in the Digital Era that discusses strategic issues that organizations of different sizes and levels of digital maturity face Part III Innovation and digital transformation presents examples from different sectors where AI and other innovative technologies are integrated in business Part IV The Future of Work focuses on the changing conditions of workspaces and their implications for human resource management and the future of work Part V Leadership and Skills for the Digital Era explores the impact of this changing business and societal landscape and studies the leadership style and skills needed in these conditions Finally Part VI The Future of Business Education studies how such skills and leadership may be cultivated in business education and draws lessons for the future The book is based on a selection of the best papers on this topic presented at the international conference LMDE held in Athens Greece in June 2023 Shifting Paradigms Zia Qureshi,Cheonsik Woo,2022-01-11 Addressing the big questions about how technological change is transforming economies and societies Rapid technological change likely to accelerate as a consequence of the COVID 19 pandemic is reshaping economies and how they grow But change also causes disruption creates winners and losers and produces social stress This book examines the challenges of digital transformation and suggests how creative policies can make it more productive and inclusive Shifting Paradigms is the second book on technological change produced by a joint research project of the Brookings Institution and the Korea Development Institute Contributors are experts from the United States Europe and Korea The first volume Growth in a Time of Change was published by Brookings in February 2020 The book s underlying thesis is that the future is arriving faster than expected Long accepted paradigms about economic growth are changing as digital technologies transform markets and nearly every aspect of business and work Change will only intensify with advances in artificial intelligence and other innovations Investors business leaders workers and public officials face many questions Is rising market concentration inevitable with the new technologies or can their benefits be more widely shared How can the promise of FinTech be captured while managing risks Should workers fear the new automation Are technology driven shifts in business and work causing income inequality to rise How should public policy respond Shifting Paradigms addresses these questions in an engaging manner for anyone interested in understanding how the economic and social agenda is being transformed by today s winds of change *The ASEAN Digital Economy* Paul Cheung,Xie Taojun,2023-08-15 Boasting the fastest growing Internet market in the world Association of Southeast Asian Nations ASEAN is accelerating into the digital economy This book assesses the potential economic impact of digital economy agreements

DEAs and the readiness of some ASEAN member states to grow the digital economy in collaboration The book presents a novel framework to assess countries readiness to enter digital economy collaborations following the architecture of Singapore s DEAs with its trading partners It takes a bird s eye view of the digital economy in ASEAN and reviews the current state of digital infrastructure and regulations The book also includes simulation exercises to project economic outcomes delivered by regional collaborations It also elaborates on the specific strengths and weaknesses of five ASEAN member states These ASEAN member states include Indonesia Malaysia the Philippines Vietnam and Cambodia The book concludes by revisiting the ASEAN economy as a whole It points out key issues country leaders need to work on as they proceed with digital economy collaborations This book is written for scholars policymakers and industrial practitioners who wish to learn the latest developments in the ASEAN digital economy OECD Studies on SMEs and Entrepreneurship The Digital Transformation of SMEs OECD,2021-02-03 Despite potentially tremendous benefits small and medium sized enterprises SMEs lag in the digital transformation Emerging technologies as diverse as they are offer a range of applications for them to improve performance and overcome the size related limitations they face in doing business However SMEs must be better prepared and stakes are high SMEs make the most of the industrial fabric in many countries and regions they create jobs most jobs sometimes and are the cement of inclusive and sustainable societies
