Merle Spriggs

Body Soul And Bioethics:

Body, Soul, and Bioethics Gilbert Meilaender, 1995 Meilaender suggests that the development bioethics as a discipline in its own right has not been entirely benign He argues that an increasing focus on public policy has obscured the importance of background beliefs about human nature and destiny and that without drawing attention to those beliefs one cannot fully see what is at stake in many bioethical debates Rather than seeking a minimalist consensus Meilaender explores ethical problems surrounding the end and beginning of life in order to uncover the soul That is some of the deeper issues within bioethics that need our attention Abortion the issue that so often lurks just beneath the surface of bioethical argument is discussed in the final chapter Throughout the book Meilaender emphasizes the soul of all these issues questions about who we are and what we may become and suggests that recapturing that soul will lead us to a new appreciation of the living body as the locus of personal presence

What Is a Human? John H. Evans, 2016-07-01 Scholars claim that if the public has particular definitions of a human they will treat others like objects or animals This book examines these claims and finds that some definitions do lead to maltreatment but the definitions of a majority of the public are unlikely to do so

Christianity and the Disciplines Mervyn Davies, Oliver D. Crisp, Gavin D'Costa, Peter Hampson, 2012-11-02 This volume will show how various intellectual disciplines most found within the modern university can learn from theology and philosophy in primarily methodological and substantive terms It will explore the possible ways in which current presuppositions and practices of the discipline might be challenged It will also indicate the possibilities of both a Christian Culture in relation to that discipline or the way in which that discipline might look within a real or theoretical Christian university

Autonomy and Patients' Decisions Merle Spriggs, 2005-01-01 Patient autonomy is an important concept in the clinical context but the idea in contemporary bioethics discussions is often muddled By looking closely at the ideas of Rousseau Kant and Mill *Autonomy and Patients Decisions* traces the modern concept of autonomy from its historical roots then identifying the four distinct notions of autonomy being referred to in contemporary discussion

Culture of Death Wesley J. Smith, 2016-05-17 When his teenage son Christopher brain damaged in an auto accident developed a 105 degree fever following weeks of unconsciousness John Campbell asked the attending physician for help The doctor refused Why bother The boy's life was effectively over Campbell refused to accept this verdict He demanded treatment and threatened legal action The doctor finally relented With treatment Christopher's temperature which had eventually reached 107.6 degrees subsided almost immediately Soon afterward the boy regained consciousness and was learning to walk again This story is one of many Wesley J Smith recounts in his award winning classic critique of the modern bioethics movement *Culture of Death* In this newly updated edition Smith chronicles how the threats to the equality of human life have accelerated in recent years from the proliferation of euthanasia and the Brittany Maynard assisted suicide firestorm to the potential for death panels posed by Obamacare and the explosive Terri Schiavo controversy *Culture of Death* reveals how more and more doctors have withdrawn from the Hippocratic Oath and

how bioethicists influence policy by posing questions such as whether organs may be harvested from the terminally ill and disabled This is a passionate yet coolly reasoned book about the current crisis in medical ethics by an author who has made the new thanatology his consuming interest **Military Medical Ethics, Volume 1**, **Medical Humanities** Thomas R. Cole, Nathan S. Carlin, Ronald A. Carson, 2015 This textbook uses concepts and methods of the humanities to enhance understanding of medicine and health care *Vulnerability and Care* Andrew Sloane, 2016-01-28 Medical and bioethical issues have spawned a great deal of debate in both public and academic contexts Little has been done however to engage with the underlying issues of the nature of medicine and its role in human community This book seeks to fill that gap by providing Christian philosophical and theological reflections on the nature and purposes of medicine and its role in a Christian understanding of human society The book provides two main doorways into a Christian philosophical theology of medicine First it presents a brief description of the contexts in which medicine is practiced in the early 21st century identifying key problems and challenges that medicine must address It then turns to issues in contemporary bioethics demonstrating how the debate is rooted in conflicting visions of the nature of medicine and so human existence This leads to a discussion of some of the philosophical and theological resources currently available for those who would reflect Christianly on medicine The heart of the book consists of an articulation of a Christian understanding of medicine as both a scholarly and a social practice articulating the philosophical theological framework which informs this perspective It fleshes out features of medicine as an inherently moral practice one informed by a Christian social vision and shaped by key theological commitments The book closes by returning to the issues relating to the context of medicine and bioethics with which it opened demonstrating how a Christian philosophical theology of medicine informs and enriches those discussions

Personhood and Health Care David C. Thomasma, David N. Weisstub, Christian Hervé, 2013-04-17 PERSONHOOD AND HEALTH CARE This book arose as a result of a pre conference devoted to the topic held June 28 1999 in Paris France The pre conference preceded the Annual Congress of the International Academy of Law and Mental Health Other chapters were solicited after the conference in order to more completely explore the relation of personhood to health care The pre conference was held in honor of Yves Pelicier who led so many of our French colleagues in medicine philosophy and ethics as Christian Herve notes in his Tribute As health care is aimed at healing persons it is important to realize how difficult it is to construct a theory of personhood for health care and thus a theory of how healing in health care comes about or ought to occur The book is divided into four parts Concepts of the Person Theories of Personhood in Relation to Health Care and Bioethics Person and Identity and Personhood and Its Relations Each section explores a critical arena in constructing the relation of personhood to health care Although no exploration of this nature can be exhaustive every effort was made to present both conflicting and complementary views of personhood from within similar and different philosophical and religious traditions PART ONE CONCEPTS OF THE PERSON Tracing the origins of the concept of person from antiquity

through present day Jean Delemeau provides an historical sketch of the development of a wide range of meanings

Military Medical Ethics Anthony E. Hartle, Edmund D. Pellegrino, 2003 2 volumes sold as a set Textbooks of Military Medicine Section editors Edmund D Pellegrino Anthony E Hartle and Edmund G Howe et al Addresses medical ethics within a military context
