Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders **Counseling Methods and**

Dattilio,2013-06-29 This is the golden age of cognitive therapy Its popularity among society and the professional community is growing by leaps and bounds What is it and what are its limits What is the fundamental nature of cognitive therapy It is to my way of thinking simple but profound To understand it it is useful to think back to the history of behavior therapy to the basic development made by Joseph Wolpe In the 1950s Wolpe astounded the therapeutic world and infuriated his colleagues by finding a simple cure for phobias The psychoanalytic establishment held that phobias irrational and intense fear of certain objects such as cats were just surface manifesta tions of deeper underlying disorders The psychoanalysts said their source was the buried fear in male children of castration by the father in retaliation for the son s lust for his mother For females this fear is directed toward the opposite sex parent The biomedical theorists on the other hand claimed that some as yet undiscovered disorder in brain chemistry must be the underlying problem Both groups insisted that to treat only the patient s fear of cats would do no more good than it would to put rouge over measles Wolpe however reasoned that irrational fear of
