British Nuclear Deterrent After The Cold:

The British Nuclear Deterrent After the Cold War Nicholas K. J. Witney, 1995 The Trident nuclear deterrent program is one of the United Kingdom's largest ever military acquisitions Planned and initiated during the Cold War it is now coming to fruition at a time when the most obvious justification for it the Soviet threat to Western Europe has disappeared With the money largely spent or committed Britain's continuance as a nuclear weapon state until well into the twenty first century seems certain But with what point and purpose This report examines the history the underlying issues the policy options and the risks related to redefining a rationale for Britain's nuclear deterrence program The author reviews the role the United States has played in the development of Britain's nuclear policy and discusses how a new rationale might affect U S U K relationships

The United Kingdom and the Future of Nuclear Weapons Andrew Futter, 2016-06-16 Since 1969 the United Kingdom always has always had one submarine armed with nuclear tipped ballistic missiles underwater undetected in constant communication ready at a set notice to fire at targets anywhere in the world This is part of its Trident Programme which includes the development procurement and operation of the current generation of British nuclear weapons as well as the means to deliver them Operated by the Royal Navy and based at Clyde Naval Base on Scotland's west coast it is the most expensive and most powerful capability of the British military forces In 2016 the United Kingdom had to decide on whether to go ahead and build the next generation of nuclear submarines that will allow the UK to remain in the nuclear business well into the second half of this century The book presents the political cultural technical and strategic aspects of Trident to provide a thoughtful overview of the UK's complex relationship with nuclear weapons The authors both scholars and practitioners bring together diverse perspectives on the issue discussing the importance of UK nuclear history as well as the political legal and diplomatic aspects of UK nuclear weapons internationally and domestically Also addressed are the new technical military and strategic challenges to the UK nuclear thinking and strategy

A European Security Architecture after the Cold War G. Aybet, 2000-06-05 A European Security Architecture after the Cold War provides a critical account of the re projection and redefinition of Western values and security institutions in the post Coldwar era This transformation is explored in three stages The first stage covers the period 1990 91 and explains the preservation of a western security community inherited from the Cold War through a process of institutional reconstruction largely carried out on paper The second stage from 1991 to 1992 sees the incorporation of a purpose for these institutions as a framework for the implementation of collective security The third stage explores the emerging questions of legitimacy surrounding the new tasks of these institutions as they become embroiled in the war in the former Yugoslavia The precedents of legitimate intervention in upholding democracy free markets and human rights in the post coldwar era are examined from the perspectives of international law and Gramscian derived concepts of legitimacy focusing on the acceptance of military power by civil society and how intervention in these terms becomes a cultural practice

The Development of British Defence

Policy David Brown, 2016-03-16 Britain's military forces have rarely been busier. It is therefore crucial to understand the developing trends and underlying assumptions of British Defence Policy in regard to both foreign policy and international security. This volume, which covers both the Blair and Brown eras in defence policy making, places developments post 11 September in a wider context, assessing the impact of key personalities and events on a range of issues, notably the perennial concern of military overstretch. By critically appraising contemporary developments and examining the driving policy in specific cases, this volume provides a relevant and up-to-date assessment of this vital policy area. As well as being contemporary in its analysis, the work is also comprehensive in scope, embracing both policy objectives such as the expeditionary strategy and the desire to be a bridge between the US and EU and the instruments that underpin such policy.

The British Way in Cold Warfare Matthew Grant, 2011-10-20 By utilising the latest research, readers will be given a complete picture of the way Britain fought the Cold War, moving the focus away from the now familiar crises of Suez and Cuba and onto the themes that underpinned the British war strategy. Intelligence, civil defence and nuclear diplomacy are all examined within the context of modern British history at a time of national decline. There is a growing interest in the contexts of the Cold War and this collection will establish itself as the leading volume on the UK's wartime strategy. The future of the UK's strategic nuclear deterrent Great Britain: Parliament: House of Commons: Defence Committee, 2007-03-07 future of the UK's strategic nuclear Deterrent The White Paper ninth report of session 2006-07 Vol 2 Oral and written Evidence

The Demise of the Soviet Union Jan Hallenberg, 2018-05-08 This title was first published in 2002. Designed as a research text for academics in higher education and interested practitioners, this volume weaves together an original strand of international relations theory with key empirical case studies of the United States, United Kingdom, France and Sweden and their attitudes towards the Soviet Union. Original in nature and composition, the book deals with aspects of predictability in foreign policy and gauges the level of impact that international events have on domestic levels of awareness. The hypothesis and the typology are solid, giving the book its strong analytical structure. In sum, this book is cutting edge. It will be of great use as a research text to those studying the countries of Western Europe and also those with an interest in Russia and the Soviet Union. Given its strong theoretical content and its choices of case study, this cross-disciplinary text is also suitable for area studies in general.

The British Nuclear Deterrent After the Cold War, 1995 The Trident nuclear deterrent program is one of the United Kingdom's largest ever military acquisitions. Planned and initiated in the depths of the Cold War, it is now coming to fruition when the most obvious justification for it, the Soviet threat to Western Europe, has disappeared. The continuation of the program is not in doubt: the money is largely spent or committed and the main political parties agree on deploying the force. But the rationale needs refurbishment. Britain has traditionally preferred to represent her nuclear capability primarily as a contribution to NATO's collective deterrence. The second center of decision-making concept defined a particular value for that contribution. This rationale seized the moral high ground by associating Britain's deterrent with

NATO's strategy to prevent war guarded the proliferation flank and underpinned Anglo American relations The British Nuclear Weapons Programme, 1952-2002 Dr Frank Barnaby, Dr Douglas Holdstock, 2004-11-23 The first British nuclear weapon test took place in Australia in October 1952 British nuclear weapons have been a source of controversy ever since In this book scientists doctors researchers and others assess the military value political impact health effects and legality of the programme **French Defence Policy Since the End of the Cold War** Alice Pannier, Olivier Schmitt, 2020-12-27 This book describes the evolution of French defence policy since the end of the Cold War For the past thirty years there have been significant changes to French defence policy as a result of several contextual evolutions Changes include shifts in the global balance of power new understandings of the notion of international security economic downturns and developments in European integration Yet despite these changes the purpose of France's grand strategy and its main principles have remained remarkably stable over time This book identifies the incentives representations and objectives of French defence policy The authors examine the general mechanisms that influence policy change and military transformation in democracies the importance of status seeking in international relations the processes of strategy making by a middle power and the dilemmas and challenges of security cooperation By doing so the book raises a number of questions related to the ways states adjust or not their security policies in a transformed international system This book makes French language sources available to non French speaking readers and contributes to a better understanding of a country that is at the forefront of Europe's external action This book will be of great interest to students of defence studies French politics military studies security studies and IR in general
