Most, Salvatore Settis, 2010-10-25 A vast cabinet of curiosities Stephen Greenblatt Eclectic rather than exhaustive less an encyclopedia than a buffet Frederic Raphael Literary Review How do we get from the polis to the police Or from Odysseus s sirens to those of an ambulance The legacy of ancient Greece and Rome is all around us imitated resisted reworked and misunderstood In this beautifully illustrated and encyclopedic compendium a team of leading scholars investigates the afterlife of this rich heritage in the fields of literature philosophy art architecture history politics religion and science From Academy to Zoology Aristotle and the Argonauts to Pegasus and Persia The Classical Tradition looks at facts and adages people places and ideas to reveal how the Classical tradition has shaped human endeavors from government to medicine drama to urban planning legal theory to popular culture At once authoritative and accessible learned and entertaining it illuminates the vitality of these enduring influences Beyond the Grand Tour

Rosemary Sweet, Gerrit Verhoeven, Sarah Goldsmith, 2017-02-17 Travel in early modern Europe is frequently represented as synonymous with the institution of the Grand Tour a journey undertaken by elite young males from northern Europe to the centres of the arts and antiquity in Italy Taking a somewhat different perspective this volume builds upon recent research that pushes beyond this narrow orthodoxy and which decentres Italy as the ultimate destination of European travellers Instead it explores a much broader pattern of travel undertaken by people of varied backgrounds and with divergent motives

for travelling By tapping into current reactions against the reification of the Grand Tour as a unique and distinctive practice this volume represents an important contribution to the ongoing process of resituating the Grand Tour as part of a wider context of travel and topographical writing Focusing upon practices of travel in northern and western Europe rather than in Italy particularly in Britain the Low Countries and Germany the essays in this collection highlight how itineraries continually evolved in response to changing political economic and intellectual contexts In so doing the reasons for travel in northern Europe are subjected to a similar level of detailed analysis as has previously only been directed on Italy By doing this the volume demonstrates the variety of travel experiences including the many shorter journeys made for pleasure health education and business undertaken by travellers of varying age and background across the period In this way the volume brings to the fore the experiences of varied categories of traveller from children to businessmen which have traditionally been largely invisible in the historiography of travel

*Kinaesthesia and Classical Antiquity 1750-1820* Helen Slaney, 2020-09-03 This book argues that touch and movement played a significant role long overlooked in generating perceptions of ancient material culture in the late 18th century At this time the reception of classical antiquity had been transformed Interactions with material culture ruins sculpture and artefacts formed the core of this transformation Some such interactions were proto archaeological such as the Dilettanti expeditions to Athens and Asa Minor others were touristic seen in the guidebooks consulted by travellers to Rome and the diaries they composed and others creative resulting in novels poetry and dance performances Some involved the reproduction of experience in a gallery or museum setting What all encounters with ancient material culture had in common however is their haptic sensory basis The sense typically associated with the Enlightenment is vision but this has obscured the equally important contribution made by touch and movement to the way in which a newly materialised Graeco Roman world was perceived Kinaesthesia or the sense of self movement is rarely recognised in its own right but because all encounters with sites and objects are embodied and all embodiment takes place in motion this sense is vital to forming more abstract or imaginative impressions Theories of embodied cognition propose that all intellectual processes are also physical This book shows how ideas about classical antiquity in the volatile milieu of the late 18th century developed as a result of diverse kinaesthetic relationships
