## **Before Logic:**

Truth before Logic Michael B. Mitchell, 2024-09-13 Truth before Logic explores the provocative implications of the claim that you can only find truth with logic if you have already found truth without it Chesterton counters the sterile truncated worldview of scientism with an appeal to a deep awareness in the heart and mind without which there would be neither science nor religion He stirs a buried awareness of the lucid but inarticulate truth that romance is the deepest thing in life and counters a myopic materialism by making us more aware of the reality that racks the soul with something of which God keeps the secret but which is stronger than sorrow or joy Few voices will be more helpful in enabling the contemporary reader to understand science within the full scope of human experience Chesterton's insights are an antidote to the soul atrophy that results from scientism and a ballast of sanity in a confidently confused world

**Before Logic** Richard Mason, 2000-03-31 2000 CHOICE Outstanding Academic Title Must logic come first Are philosophical problems really logical Must we think logically to think at all Richard Mason's case is that too much comes before logic too many choices and too much history Logic has been formed by choices made by philosophers not just as a subject of study but in terms of what has mattered the problems and the possible solutions Before Logic contains case studies of crucial choices on the formation of logical possibility on truth on the explanation of necessity on essentialism and on the location of logic For readers with interests in analytical or continental philosophy or in logic this book shows why and how history matters to logic Logic then cannot be the basis for metaphysics or an important grounding for philosophical investigations because too many important assumptions precede it The difficulty this position presents is that it avoids the obvious objections of relativism This controversial topic strikes at the heart of much post Wittgensteinian and post Heideggerian thought

*Extensionalism: The Revolution in Logic* Nimrod Bar-Am, 2008-04-03 a single life span Philosophers then do not see more or know more and they do not see less or know less They aim to see less detail and more of the abstract Their details if you like are abstractions Walking on God's earth as a pedestrian as a farmer working his fields or as a passer by one's picture of one's surroundings is every bit as intelligent as that of the pilot riding the sky The views of the field are radically different however One sees only a specific field and in all lively detail the exact pattern of the land or even the exact outline of a given leaf grasshopper grain of sand even Acquaintance with minute detail is not without its price details may stand in the way of conjuring the big picture It may be difficult to compare whichever field one happens to be in with far off fields with respect to their size or shape or any other quality One may wish to inquire if far off fields were already planted harvested or even if they exist A pedestrian may find it hard or even impossible to do so The pedestrian view contains fine points that the pilot's map never would but it does not necessarily contain more information for it lacks the general context After all there are only so many items that one can observe and account for at a single glance a single map a single book a single life span
