Behind The Screen The History And Techniques Of The Motion Picture:

Behind the Screen Kenneth Macgowan,1965 Behind the screen; the history and techniques of the motion picture K. Macgowan,1965 **Motion Picture Exhibition in Washington, D.C.** Robert K. Headley,2015-08-13 From inauspicious beginnings in the kinetoscope parlors and nickelodeons to the movie palaces of the golden era and finally to the pared down multiplexes of today this is the history of motion picture viewing in the nation s capital and vicinity The research is supported by numerous interviews The book includes a 200 page listing of all the movie theaters in the area past and present with data such as location dates of operation architect and seating capacity as well as a summary of each theater s history and current status Maps drawings and photographs most of which have never before been published round out this comprehensive study

Lee de Forest and the Fatherhood of Radio James A. Hijiya,1992 This book is not so much an analysis of de Forest s contribution to technology as it is a chronicle of his spiritual quest Lee de Forest was an important inventor and this biography attempts to explain what moved him to become one It tries to show how in a universe from which deity had seemingly disappeared de Forest s devotion to invention was part of his search for a new light The book is not a study in the history of technology but in the history of the religion of technology In 1906 de Forest created the Audion the three electrode vacuum tube which became the foundation of the electronics industry for half a century He was a pioneer in radio and talking pictures and he worked on projects ranging from television to solar energy Holder of more than three hundred patents he was one of the most prolific inventors in American history But he was more than that Lee de Forest had an immense curiosity that extended beyond science and engineering to politics literature and religion His active and far ranging mind became a register for many social and intellectual events during his long life from Populism to McCarthyism and from Darwinism to agnosticism But while his interests were diverse his vision was not For him invention was not merely a vocation but a worldview He represented a technological progressivism that advocated reform but reform stemming less from social engineering than from real engineering Although he favored certain improvements in law and education he did not think that these would be the basis of social transformation Instead he believed that inventions ranging from radios to war planes would reform the human condition and that the future was more in the hands of inventors than statesmen The millenium would be a technical innovation with himself as one of its principal inventors As a young man de Forest came to spurn conventional notions of an immortal soul but he never ceased to seek ways to overcome death not merely the physical death of the body but also the spiritual death of living without purpose The fame of his inventions would he hoped keep him forever alive in the memory of posterity Moreover the good that his inventions did for humanity his contribution to progress would give meaning to his existence For Lee de Forest then invention was a substitute for religion By helping to build the future he sought to become an indelible part of it BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Media and the American Mind* Daniel J. Czitrom,2010-02-03 In a fascinating and comprehensive intellectual

history of modern communication in America Daniel Czitrom examines the continuing contradictions between the progressive possibilities that new communications technologies offer and their use as instruments of domination and exploitation

Movie-Made Los Angeles John Trafton, 2023-10-17 Explores the proto cinematic visual culture of Los Angeles that set the scene for modern Hollywood Los Angeles was a cinematic city long before the rise of Hollywood By the dawn of the twentieth century photography painting and tourist promotion in Southern California provided early filmmakers with a template for building a myth making business and envisioning ideal moviegoers These art forms positioned California as a land of transformative experiences and catapulted the dusty backwater town of Los Angeles to the largest city on the west coast by 1915 Photography aided the Southern Pacific Railroad Company in opening the region to the rest of nation Painters gave traditions that were fading in Europe a new lease on life in the California sun with signature colors and techniques that would be adopted by L A real estate companies agribusiness and health retreats Tourism infused the iconography and signature styles of art with cultural mythology of the state s colonial past offering proto cinematic experiences to those who ventured west Author John Trafton explores how Hollywood an industry based on world building was the product of these art forms in the land of sunshine A more complete story of the American film industry s ascendancy in Los Angeles emerges when one considers how the City of Angels cultivated its self image through pre cinema narrative art *The Sixties* Paul Monaco, 2003-06 This book covers the 1960 s as part of the definitive history of American cinema from its emergence in the 1800s to the present day *Censoring Sex* John E. Semonche, 2007-07-20 In this gracefully written accessible and

entertaining volume John Semonche surveys censorship for reasons of sex from the nineteenth century up to the present He covers the various forms of American media books and periodicals pictorial art motion pictures music and dance and radio television and the Internet The tale is varied and interesting replete with a stock of colorful characters such as Anthony Comstock Mae West Theodore Dreiser Marcel Duchamp Opie and Anthony Judy Blume Jerry Falwell Alfred Kinsey Hugh Hefner and the Guerilla Girls Covering the history of censorship of sexual ideas and images is one way of telling the story of modern America and Semonche tells that tale with insight and flair Despite the varieties of censorship running from self censorship to government bans a common story is told Censorship whether undertaken to ward off government regulation to help preserve the social order or to protect the weak and vulnerable proceeds on the assumption that the censor knows best and that limiting the choices of media consumers is justified At various times all of the following groups were perceived as needing protection from sexually explicit materials children women the lower classes and foreigners As social and political conditions changed however the simple fact that someone was a woman or a day laborer did not support stereotyping that person as weak or impressionable What would remain as the only acceptable rationale for censorship of sexual materials was the protection of children and unconsenting adults For each mode of media Semonche explains via abundant examples how and why censorship took place in America *Censoring Sex* also traces the story of how the cultural territory contested by

those advocating and opposing censorship has diminished over the course of the last two centuries Yet Semonche argues the censorship of sexual materials that continues in the United States poses a challenge to the free speech that is part of the foundation upon which the nation is built Indeed in an era in which sexual images are pervasive and the need for reliable information about sex and sexuality is growing he questions the remaining rationales for censorship and the justification for placing obscenity outside the protection of the U S Constitution **Architecture for the Screen** Juan Antonio

Ramírez,2012-04-11 Most of us have never found ourselves trapped inside a burning skyscraper or entombed within an Egyptian pyramid but we probably have some idea of what it would be like because of their portrayal on screen The movies have overcome the constraints of time and place by bringing us images of diverse and otherwise unfamiliar settings This work covers the many applications of art and architecture appearing in the movies produced in Hollywood from the very beginning until the fifties The first chapters deal with the process of design construction physical characteristics and immediate functions of a wide variety of architectural sets The remaining chapters examine the great number of styles shown in those movies and take the reader up to the final triumph of modernist architecture in the aftermath of the Second World War *Guidebook to Film* Ronald Gottesman,Harry M.
