A Bimodal Crisis Stanley Burnham,1993-01-01 **America's Bimodal Crisis** Stanley Burnham,1993 **The Myth of Race** Robert Wald Sussman,2014-10-06 Although eugenics is now widely discredited some groups and individuals claim a new scientific basis for old racist assumptions Pondering the continuing influence of racist research and thought despite all evidence to the contrary Robert Sussman explains why when it comes to race too many people still mistake bigotry for science *H.H. LAUGHLIN: American Scientist. American Progressive. Nazi Collaborator.* A.E. Samaan,2020-11-09 H H Laughlin was crucial for the Nazi s crusade to breed a master race This American positioned himself to have a significant effect on the world s population During his career Laughlin Wrote the Model Eugenical Law copied by the Nazis to draft the Nuremberg racial decrees Was appointed as an expert witness for the U S Congress when the 1924 Immigration Restriction Act was passed The 1924 Act would prevent Jewish refugees from reaching the safety of U S shores during The Holocaust Provided the scientific basis for the 1927 Supreme Court case of Buck v Bell that made eugenic sterilization legal in the United States Over 80 000 Americans were sterilized against their will as a consequence Defended Hitler s Nuremberg decrees as scientifically sound in the American press in order to dispel the criticism of Nazi eugenics Created the political organization that ensured that scientific racialism would survive the negative taint of The Holocaust and be instrumental in the Jim Crow era of American legislative racism H H Laughlin was given an honorary degree from Heidelberg University by Hitler s government specifically for these accomplishments Yet no one has ever written a book on Laughlin Despite the vast number of books about The Holocaust Laughlin is mostly unknown outside of academic circles H H Laughlin was funded by the Carnegie Institution of Washington D C This author was given permission to survey the institution s Laughlin s archived correspondence These documents had not been seen for decades and were all but lost to history They are the backbone of this book as they evidence Laughlin s collaboration with Hitler s henchmen The story told by these long forgotten documents intensifies at the juncture when the Carnegie leadership came to the horrible realization that one of its most recognized scientists was supporting Hitler s regime www.HHLaughlin.com NOTE This book was circulated amongst academic circles and other interested parties as an Advanced Readers Copy A R C in 2015 It is a part the Eugenics Anthology seven book series that is currently being completed by A E Samaan Hardbound versions of the books will not be released until the series is complete and all the puzzle pieces in place For more information please visit EugenicsAnthology.com [Dismantling Contemporary Deficit Thinking](#) Richard R. Valencia,2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning Dismantling Contemporary Deficit Thinking provides comprehensive critiques and anti deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking Dismantling Contemporary Deficit

Thinking examines the ongoing social construction of deficit thinking in three aspects of current discourse the genetic pathology model the culture of poverty model and the at risk model in which poor students students of color and their families are pathologized and marginalized Richard R Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation s public schools Valencia also discusses a number of proactive anti deficit thinking suggestions from the fields of teacher education educational leadership and educational ethnography that are intended to provide a more equitable and democratic schooling for all students

Race, Popular Culture, and Far-right Extremism in the United States Priya Dixit, 2022-10-25 This book analyzes key popular culture artifacts linked with United States far right extremism to illustrate how extremists use various narrative strategies to legitimate their interests and goals and to justify violent actions Recognizing these narrative strategies and how they are used partly explains the back and forth moves between mainstream politics and the far right of ideas and issues that used to remain within far right circles The main objective of this book is to utilize theoretical approaches that centralize processes of racialization to analyze and explain how far right extremists utilize recognizable narratives to mainstream and communicate their ideas The book will illustrate processes by which racialized subjects are produced and violence justified In order to do so the book concentrates on popular culture as sources of how the far right constitutes their identities and goals It first develops a methodological plan to study popular culture artifacts that is drawn from scholarship on race and discourse analysis in International Relations IR It then analyzes far right use of key popular culture artifacts such as magazines memes and manifestos to note how extremist identities and interests are produced publicly communicated and mainstreamed This will contribute to Security Studies and IR s understanding of far right extremism especially how they utilize similar narrative strategies as used in mainstream contexts to justify their calls for violence

Hollywood and Africa Opio Dokotum, 2020-02-05 Hollywood and Africa recycling the Dark Continent myth from 1908 2020 is a study of over a century of stereotypical Hollywood film productions about Africa It argues that the myth of the Dark Continent continues to influence Western cultural productions about Africa as a cognitive based system of knowledge especially in history literature and film Hollywood and Africa identifies the colonial mastertext of the Dark Continent mythos by providing a historiographic genealogy and context for the terms development and consolidation An array of literary and paraliterary film adaptation theories are employed to analyse the deep genetic strands of Hollywood Africa film adaptations The mutations of the Dark Continent mythos across time and space are then tracked through the classical neoclassical and new wave Hollywood Africa phases in order to illustrate how Hollywood productions about Africa recycle revise reframe reinforce transpose interrogate and even critique these tropes of Darkest Africa while sustaining the colonial mastertext and rising cyberactivism against Hollywoods whitewashing of African history

Mistaking Africa Curtis A Keim, 2013-07-16 For many Americans the mention of Africa immediately conjures up images of

safaris ferocious animals strangely dressed tribesmen and impenetrable jungles Although the occasional newspaper headline mentions authoritarian rule corruption genocide devastating illnesses or civil war in Africa the collective American consciousness still carries strong mental images of Africa that are reflected in advertising movies amusement parks cartoons and many other corners of society Few think to question these perceptions or how they came to be so deeply lodged in American minds Mistaking Africa looks at the historical evolution of this mind set and examines the role that popular media plays in its creation The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa Updated throughout the fourth edition covers the entire continent North and sub Saharan Africa and provides new analysis of topics such as social media and the Internet the Ebola crisis celebrity aid and the Arab Spring Mistaking Africa is an important book for African studies courses and for anyone interested in unraveling American misperceptions about the continent Censorship Derek Jones,2001-12-01 Censorship A World Encyclopedia presents a comprehensive view of censorship from Ancient Egypt to those modern societies that claim to have abolished the practice For each country in the world the history of censorship is described and placed in context and the media censored are examined art cyberspace literature music the press popular culture radio television and the theatre not to mention the censorship of language the most fundamental censorship of all Also included are surveys of major controversies and chronicles of resistance Censorship will be an essential reference work for students of the many subjects touched by censorship and for all those who are interested in the history of and contemporary fate of freedom of expression Sex Linkage of Intelligence Robert Lehrke,1997-11-30 The author presents a theory that major genes controlling the growth of human intelligence both left and right brain attributes are on the X chromosome The more significant of the implications of such X linkage include L L DBL Males tend to be more variable in intelligence It is well known that males are far more likely to have intellectual deficits including mental subnormality learning disorders and behavior problems This book also presents evidence that males are more likely to be exceptionally high in cognitive abilities other than memory and in such areas as advanced mathematics spatial perception and creative music L L DBL Partial or total reversions to the aboriginal level of intelligence can account for virtually all cases of non specific mental subnormality These conditions are now identified by such terms as Renpenning syndrome Martin Bell syndrome Fragile X syndrome and cultural familial mental retardation Because of the probability of offsetting genes females are less likely to be severely affected by these conditions DBL Since the X linked genes control a pattern of growth boys are more variable in the age of readiness for the skills required for progress in school Some are precocious but many are delayed and not ready for the three R s at the traditional age of 6 This is the basis for almost all cases of learning disability L L DBL Being on the X chromosome these genes favorable or unfavorable are not passed on from father to son although they are passed on from father to daughter This invalidates earlier studies of parent child transmission of IQ which have included father son correlations In effect earlier

studies have come up with estimates of the heritability of intelligence that are too low
