Americas Older Population:

America's Older Population Paul E. Zopf, 1986 A Generation of Change Jacob S. Siegel, 1993-02-18 A Generation of Change is an exceptional study of the nation's elderly a population that has undergone profound changes in the years since World War II As modern medicine extends the average life span and the baby boom generation begins to approach middle age the number of older Americans is expected to more than double in the next century Currently 75 percent of U S health care expenditures go toward the elderly But as national trends toward early retirement and low birthrate continue an aging American population could face crises in meeting their financial and physical needs According to Jacob S Siegel in A Generation of Change astute public planning must be informed by an understanding of the demographic social and economic characteristics of the older population as it is today and as it will be in the coming years Siegel employs census and survey data from 1950 through the mid 1980s to describe a population constantly shifting in its ethnic and gender composition geographic distribution marital and living arrangements health employment and economic status Surprisingly there is tremendous disparity in the quality of life among the elderly Although their average poverty rate is below that of the general population there are dramatic levels of poverty among older women who are far more likely than men to live alone or in institutions As the elderly progress from the young old to the aged old those over 85 sharp differences emerge as income and employment decrease and degrees of chronic illness increase In addition residential location influences the quality of health care and public assistance available to the elderly an effect that may account for the marked migration of older people to Florida and Arizona Siegel analyzes the full range of characteristics for this heterogeneous population and through comparisons with other age groups as well as with the elderly of the previous decades portrays the crucial influence of social and economic conditions over the life course on the quality of later life With our elderly population growing more numerous and long lived accurate information about them is increasingly essential A Generation of Change will serve as a valuable resource for policymakers seeking more effective solutions in critical areas such as housing long term health care and the funding of Social Security and retirement programs A Volume in the Russell Sage Foundation Census Series Growth of America's Oldest-old Population ,1992 *Fact Book on Aging* National Council on the Aging.
