Trending Mindfulness Meditation:

The Best of No Small Thing - Mindful Meditations Deborah Hawkins, 2019-12-22 No Small Thing Mindful Meditations NoSmallThing.net was launched in 2010 with the intention of reflecting on experiences that generated feelings of gratitude in order to create a positive mood and orientation to life. As of fall of 2019, over 500 reflections, mindful meditations have been published along with over 100 tips that can be employed in a gratitude practice. This mindfulness process is detailed in a companion book *Practice Gratitude Transform Your Life*. It emphasizes the creation of personal gratitude themes, one's Grateful Dozen, which can help a person see things that spark grateful feelings in new situations. This is a collection of favorite blog posts that came out of this process.

Trends in Psychotherapy Research M. E. Abelian, 2006 Psychotherapy is the treatment of mental and emotional disorders using psychological methods. Psychotherapy thus does not include physiological interventions such as drug therapy or electroconvulsive therapy, although it may be used in combination with such methods. Behaviour therapy aims to help the patient eliminate undesirable habits or irrational fears through conditioning. Techniques include systematic desensitisation, particularly for the treatment of clients with irrational anxieties or fears, and aversive conditioning, which uses negative stimuli to end bad habits. Humanistic therapy tends to be more optimistic, basing its treatment on the theory that individuals have a natural inclination to strive toward self-fulfilment. Therapists such as Carl Rogers and Abraham Maslow used a highly interactive client-therapist relationship, compelling clients to realise exactly what they are saying or how they are behaving in order to foster a sense of self-awareness. Cognitive therapies try to show the client that certain usually negative thoughts are irrational, with the goal of restructuring such thoughts into positive, constructive ideas. Such methods include rational emotive therapy, where the therapist argues with the client about his negative ideas, and cognitive restructuring therapy, in which the therapist works with the client to set attainable goals. Other forms of therapy stress helping patients to examine their own ideas about themselves.

Mindfulness in Internet and New Media Wen-Ko Chiou, Chao Liu, Hao Chen, Shuhua Zhou, 2023-10-24 Mindfulness is about being aware in a certain way, being consciously aware on purpose, living in the present moment without mental judgment. In addition to the in-depth application of mindfulness in different subdisciplines of psychology, e.g. social, personality, clinical, developmental, health, organizational, there is also a trend toward cross-fertilization with other social and behavioral disciplines, e.g. design, kinesiology, sociology, family studies, education, anthropology, neuroscience, philosophy, economics, medicine, organizational science. However, the application of mindfulness in the field of communication is limited. With the rapid development of the Internet and new media, the study of Internet communication is growing rapidly. The Internet and new media make it easy to connect with others, explore a new world, and regard cyberspace as an extension of one's own thoughts and personality. Nevertheless, when people use the Internet and new media mindlessly, they will easily experience the social effects on their virtual selves and encounter psychological problems, e.g. network morality, network anxiety, network

pornography network addiction and cyberbullying which has become a widespread and serious problem As an important part of positive psychology mindfulness intervention has been proved to help improve a series of negative psychological states and promote positive emotions and subjective well being However what theoretical and practical contributions can mindfulness in the Internet and new media bring remains unknown Thus this Research Topic focuses on the influence and intervention of mindfulness on the psychological problems caused by the network new media communication We welcome high quality studies using a variety of research methods including quantitative qualitative mixed methods and reviews on the second generation of mindfulness interventions and other meditation based interventions e g focused attention meditation transcendental meditation and loving kindness meditation This Research Topic encourages submissions that cover but are not limited to the following topics 1 The internet and new media guided mindfulness and loving kindness meditation practice 2 Mindfulness and interpersonal communication in the network network trust network security network intimacy 3 Mindfulness and network clustering behavior 4 Mindfulness and online consumer psychology 5 Mindfulness and cyber moral psychology cyberbullying cyber altruism and prosocial behavior 6 Mindfulness and online pornography 7 Mindfulness and internet addiction 8 Mindfulness and online psychological counseling 9 Mindfulness and new media anxiety
