The rise of technological advances has produced an increase in remote work and virtual teams, especially within business settings, to deal with global competition and the rise of non-routine work. However, the COVID-19 pandemic generated an even greater increase in the utilization of remote work and virtual teams, not only in business but in higher education as well, and it appears that this trend is not going away. Thus, it is crucial to teach students how to work effectively in virtual teams to prepare them for their future careers.

Training current employees in virtual teaming skills is also necessary as more professionals are transitioning into remote or hybrid work. Cultivating Creative Collaboration in Student Virtual Teams in Higher Education Design and Climate provides an in depth understanding of how to design academic courses and business training experiences that can offer employees and college level students hands on experiences to develop virtual teamwork skills.
