Michalos, 2023-05-24 This encyclopedia edited by the past editors and founder of the Journal of Business Ethics is the only reference work dedicated entirely to business and professional ethics Containing over 2000 entries this multi volume major research reference work provides a broad based disciplinary and interdisciplinary approach to all of the key topics in the field The encyclopedia draws on three interdisciplinary and over lapping fields business ethics professional ethics and applied ethics although the main focus is on business ethics The breadth of scope of this work draws upon the expertise of human and social scientists as well as that of professionals and scientists in varying fields This work has come to fruition by making use of the expert academic input from the extraordinarily rich population of current and past editorial board members and section editors of and contributors to the Journal of Business Ethics *Social Science Perspectives on Climate Change* David Canter, 2017-10-02 Although it is generally accepted that the climate is changing for the worse and that human activities are a major contributing factor in that change there is still only marginal response to the challenge posed by climate change The reasons behind this limited response are becoming clearer through the recognition that climate change is not just a set of physical

science facts but it is also part of a series of complex social processes. Consequently, this book is important in providing social science perspectives on a range of attempts to adjust human activity to reduce its environmental impact. These attempts vary from the changing of the dress code in Japanese offices to the creation of zero carbon gated communities in Bangalore, India. Taken together, the contributions to this book provide timely insights into the complexities of saving the planet through human endeavour.
