Knutson, 2017-07-05 *Contours of African American Politics* chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyze the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society This two volume set presents a selection of scholarship on African American politics as it appeared in *The National Political Science Review* from its initial launch in 1989 to the spring of 2009 Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field The volumes are organized around themes that derive from the unfolding real life drama of African American politics and its subsequent scholarly treatment The result is a window into the political efforts that meld the historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral based mass mobilization necessary for optimizing the impact of the African American vote Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organization The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics **The Lost Black Scholar** David A. Varel, 2018-04-13 Allison Davis 1902-83 a preeminent black scholar and social science pioneer is perhaps best known for his groundbreaking investigations into inequality Jim Crow America and the cultural biases of intelligence testing Davis one of America's first black anthropologists and the first tenured African American professor at a predominantly white university produced work that had tangible and lasting effects on public policy including contributions to *Brown v Board of Education* the federal Head Start program and school testing practices Yet Davis remains largely absent from the historical record For someone who generated such an extensive body of work this marginalization is particularly surprising But it is also revelatory In *The Lost Black Scholar* David A. Varel tells Davis's compelling story showing how a combination of institutional racism disciplinary eclecticism and iconoclastic thinking effectively sidelined him as an intellectual A close look at Davis's career sheds light not only on the racial politics of the academy but also the costs of being an innovator outside of the mainstream Equally important Varel argues that Davis exemplifies how black scholars led the way in advancing American social thought Even though he was rarely acknowledged for it Davis refuted scientific racism and laid bare the environmental roots of human difference more deftly than most of his white peers by pushing social science in bold new directions Varel shows how Davis effectively helped to lay the groundwork for the civil rights movement *Black San Francisco* Albert S. Broussard, 1993 This work explores race relations in the city of San Francisco where whites for the most part were outwardly civil to blacks while

denying them employment opportunities and political power The author argues that it is essential to understand the nature of the racial caste system *Keywords for African American Studies* Erica R. Edwards,Roderick A. Ferguson,Jeffrey O.G. Ogbar,2018-11-27 Introduces key terms interdisciplinary research debates and histories for African American Studies As the longest standing interdisciplinary field African American Studies has laid the foundation for critically analyzing issues of race ethnicity and culture within the academy and beyond This volume assembles the keywords of this field for the first time exploring not only the history of those categories but their continued relevance in the contemporary moment Taking up a vast array of issues such as slavery colonialism prison expansion sexuality gender feminism war and popular culture *Keywords for African American Studies* showcases the startling breadth that characterizes the field Featuring an august group of contributors across the social sciences and the humanities the keywords assembled within the pages of this volume exemplify the depth and range of scholarly inquiry into Black life in the United States Connecting lineages of Black knowledge production to contemporary considerations of race gender class and sexuality *Keywords for African American Studies* provides a model for how the scholarship of the field can meet the challenges of our social world **Bibliography on Racism, 1972-1975** Center for Minority Group Mental Health Programs (U.S.),1978
