Black Politics In New York City:

Black Politics in Transition Candis Watts Smith, Christina Greer, 2018-10-17 *Black Politics in Transition* considers the impact of three transformative forces immigration suburbanization and gentrification on Black politics today Demographic changes resulting from immigration and ethnic blending are dramatically affecting the character and identity of Black populations throughout the US Black Americans are becoming more ethnically diverse at the same time that they are sharing space with newcomers from near and far In addition the movement of Black populations out of the cities to which they migrated a generation ago a reverse migration to the American South in some cases and in other cases a movement from cities to suburbs shifts the locus of Black politics At the same time middle class and white populations are returning to cities displacing low income Blacks and immigrants alike in a renewal of gentrification All this makes for an important laboratory of discovery among social scientists including the diverse range of authors represented here Drawing on a wide array of disciplinary perspectives and methodological strategies original chapters analyze the geography of opportunity for Black Americans and Black politics in accessible jargon free language Moving beyond the Black white binary this book explores the tri part relationship among Blacks whites and Latinos as well Some of the most important developments in Black politics are happening at state and local levels today and this book captures that for students scholars and citizens engaged in this dynamic milieu

The Caribbeanization of Black Politics Sharon D. Wright Austin, 2018-03-01 Examines the continuing ethnic diversification of black America and its impact on black political empowerment In *The Caribbeanization of Black Politics* Sharon D Wright Austin explores the impact of ethnic diversification of African American communities on the prospects for black political empowerment Focusing on Boston Chicago Miami and New York City cities that for the last several years have experienced an influx of black immigrants she surveyed more than two thousand African Americans Cape Verdeans Haitians and West Indians Although many studies conclude that African American group consciousness causes them to participate in politics at higher rates when socioeconomic status is controlled for Wright Austin analyzes whether this is true for other black groups She assesses the current political incorporation of these groups by looking at data on public officeholders and by examining political coalitions and conflicts among the groups and she also discusses the possible future of black political development in these cities The greatest contribution of this book is its analysis of black ethnics in a diverse geographic space Moving beyond the New York City lens to Boston Chicago and Miami is something that has never been done in political science This book is incredibly important Christina M Greer author of *Black Ethnics Race Immigration and the Pursuit of the American Dream*

Black Politics Today Theodore J. Davis Jr., 2013-06-17 Theodore Davis argues that the greatest threat to the social and political cohesiveness of the so called black community may be the rise of a socially and economically privileged group among the ranks of black America Davis traces the changes in economic status public opinion political power and participation and leadership over three generations of black politics The result is an insightful

Cities, Politics, and Policy John P. Pelissero, 2002-10-01 Just because Milwaukee isn't Manhattan doesn't mean that those urban centers face completely unique challenges Through effective comparative analysis of key issues in urban studies how city managers share power with mayors how spending policies affect economic development and how school politics impact education policy students can clearly see how scholars discern patterns and formulate conclusions to offer theoretical and practical insights from which all cities can benefit Pelissero brings together an impressive team of contributors to explore variation among cities through case studies and cross sectional analyses Each author synthesizes the field's seminal literature while explaining how urban leaders and their constituents grapple with everything from city council politics to conflict and cooperation among minority groups Authors identify both key trends and gaps in the scholarship and help set the research agenda for the years to come Lively case material will hook your students while the accessible presentation of empirical evidence make this reader the comprehensive and sophisticated text you demand **Contemporary Patterns Of**

Politics, Praxis, And Culture Georgia Anne Persons, 2005-01-01 The National Political Science Review is the official publication of the National Conference of Black Political Scientists This new volume Contemporary Patterns of Politics Praxis and Culture reflects major research focuses across religion race gender culture and of course politics Themes that engage a community of scholars also engage them in praxis as individual citizens and practitioners in a democratic society and collectively as member participants in a changing culture Two themes religion and culture are relatively new areas of intellectual curiosity for political scientists Articles in this volume extend the beachheads already established by African American political scientists in studies that gauge the significance and influence of religion in both individual and group behavior They chart religion's inevitable move onto the center stage of U S public affairs The study of culture has essentially languished for almost a generation within political science especially with regard to the study of American politics and society During this time the emphasis has also shifted significantly from an almost exclusive focus on civic culture to an expanding focus on the broad expanse of popular culture in the contemporary period Culture is the crucible within which

politics race religion and gender both foment and ferment and artistic products of the culture are manifestations and mirrors of how we envision and construct a changing reality Issues of race religion gender and culture are all dimensions of individual and group identity The dynamics of changing individual and group identities change the underlying cultural canvas against which identity is displayed and politics is acted out The concept of praxis is relatively new to the lexicon of political science However engagement in the practice of politics is not a new idea for African American social scientists Indeed particularly for this group and clearly for many others scholarship influences praxis and praxis influences scholarship This volume will be of particular interest to ethnic studies specialists African American studies scholars political scientists historians and sociologists Georgia A Persons is professor of political science in the School of Public Policy at Georgia Institute of Technology where she also directs the Center for the Study of Social Change

Black Politics After the Civil Rights Movement David Covin, 2009-04-22 This important study posits a new way of understanding how ordinary Black people used the 30 years following the civil rights movement to forge a new political reality for themselves and their country While following national trends closely it focuses particularly on the political environment of Sacramento California from 1970 to 2000 Having a racial profile that is remarkably similar to the nation's demographics as a whole Sacramento serves as a useful national proxy on the racial question Unlike most studies of Black politics over the era this text pays close attention to minor actors in the political process yet places them within the context of the larger political world We see for example the local effects of the War on Poverty the Harold Washington mayoral campaigns the Rainbow Coalition the Million Man March and the great increases in locally appointed and elected Black officials within the context of similar campaigns and movements nationwide
