Blackstone's Guide to the Freedom of Information Act 2000 John Wadham, Jonathan Griffiths, 2005
The Blackstone's Guide Series delivers concise and accessible books covering the latest legislative changes and amendments. Published within weeks of an Act, they offer expert commentary by leading names on the effects, extent and scope of the legislation plus a full copy of the Act itself. They offer a cost-effective solution to key information needs and are the perfect companion for any practitioner needing to get up to speed with the latest changes. The Freedom of Information Act 2000 makes the right to access documents a reality for the first time. This legislation creates a new fundamental right to open government. The legislation will have a very significant impact on all public authorities. The Act also makes substantial amendments to, for example, the regimes of data protection and public record keeping. The right to access documents itself finally comes into force in January 2005 and it will then become essential for practitioners in the field to know about how to work with and apply its various sections. The 2nd edition of this popular Guide provides updated commentary and information on developments since Royal Assent. The new edition will include the finalised Codes of Practice and reference to relevant Statutory Instruments, plus further information and commentary on Data Protection and related Scottish and European legislation.
