edition Muhlis Can, Bodo Sturm, Jan Brusselaers, 2025-10-10 The obstacle of climate change is among the major concerns that mankind is experiencing today. Climate change poses remarkable risks to the planet and human health such as extreme weather conditions, unpredictable rain, fall, decreasing of agricultural productivity and lack of food. Thus we need to find solutions to protect the environment and to maintain sustainable development. To do that it is important to detect the impact of social and economic parameters on environmental outcomes such as economic structure, trade volume and value, human capital, education, globalization, green economy and economic complexity. In this collection we aim to expand our knowledge about the relationship between environment and different social and economic indicators which will provide us knowledge to make reliable and long term plans. Under these circumstances we need to identify the parameters that impact the environment both positively and negatively. Additionally there is need that we prepare long term plans to maintain technological, social and economic development for a sustainable ecology and biological life. Thanks to this Research Topic we aim to expand our knowledge about the potential micro and macro determinants of environmental quality and sustainable development such as economic activities, green economic and growth indicators specifically with respect to developments in green economy, green trade, green finance and green innovation as they pertain to circular economy and changing economic complexity. Potential topics include but are not limited to Innovation, economic structure and environmental quality, Trade and environment relationship, Green Economy Indicators such as Green Finance, Green Trade, Green Products and Green Innovation and their economic and environmental impacts, Economic complexity and its environmental consequences, Circular Economy as a driver of sustainable development, Theoretical formulation and empirical analysis of green economy and green growth, Economic and social determinants of sustainable development.

Environment And Business: Moving From Linear to Circular Business Haris Hermawan, Judul Environment And Business Moving From Linear to Circular Business, Penulis Haris Hermawan, MM, Ukuran 14 5 x 21 cm, Tebal 402 Halaman, Cover Soft Cover, No ISBN 978 623 10 2270 7, No E ISBN 978 623 10 2271 4, PDF SINOPSIS The concept of Circular Business stems from the broader idea of the Circular Economy which contrasts with the traditional linear economy. This model emphasizes reducing waste, reusing materials and recycling products to extend their lifecycle. Historically circular principles can be traced back to practices such as repairing and re-purposing goods but the modern framework gained momentum in the late 20th century. Circular Business models aim to decouple economic growth from resource consumption, addressing environmental challenges while creating economic opportunities. Circular Business models encompass various strategies including product as a service, sharing platforms, life extension and resource recovery. Circular business integrates sustainability into economic activities benefiting both the environment and businesses. Adopting circular models involves rethinking traditional practices focusing on long term value creation and implementing innovative solutions that contribute to a more sustainable future.
