You will learn how to: Build trust and cultivate relationships virtually across your team; Design and facilitate virtual meetings that are focused and engaging; Influence without authority; Motivate and galvanize a virtual team for top performance; Blend asynchronous and synchronous communications for better virtual collaboration; Navigate cross-cultural and generational differences in the absence of vital visual cues; Assess skills, strengths, aptitudes, and preferences from afar; Handle other tough issues that can trip up virtual teams. The ideas in this book are based on Nancy Settle-Murphy's decades of experience working as a change management consultant, facilitator, and trainer for project teams around the world. The rise of technological advances has produced an increase in remote work and virtual teams, especially within business settings, to deal with global competition and the rise of non-routine work. However, the COVID-19 pandemic generated an even greater increase in the utilization of remote work and virtual teams, not only in business but in higher education as well, and it appears that this trend is not going away. Thus, it is crucial to teach students how to work effectively in virtual teams to prepare them for their future careers.

Training current employees in virtual teaming skills is also necessary as more professionals are transitioning into remote or hybrid work. Cultivating Creative Collaboration in Student Virtual Teams in Higher Education Design and Climate provides an in depth understanding of how to design academic courses and business training experiences that can offer employees and college level students hands on experiences to develop virtual teamwork skills. It aims to nurture students professional development by enhancing their creativity while working in virtual teams and to assist faculty in designing and implementing effective virtual team learning experiences in their courses. Covering topics such as intentional team culture information sharing and setting communication norms this book is an excellent resource for educational leaders educators instructional designers technology instructors human resource HR managers business leaders professionals researchers scholars academicians and more.
