Twice Visual Performing Arts Animal:

Communication Arts ,2003 Art/Basel/Miami Beach ,2005 *Art for Animals* J. Keri Cronin,2018-04-09 Animal rights activists today regularly use visual imagery in their efforts to shape the public's understanding of what it means to be kind and humane toward animals. *Art for Animals* explores the early history of this form of advocacy through the images and the people who harnessed their power. Following in the footsteps of earlier formed organizations like the RSPCA and ASPCA, animal advocacy groups such as the Victoria Street Society for the Protection of Animals from Vivisection made significant use of visual art in literature and campaign materials. But enabled by new and improved technologies and techniques, they took the imagery much further than their predecessors did, turning toward vivid, pointed and at times graphic depictions of human-animal interactions. Keri Cronin explains why the activist community embraced this approach, details how the use of such tools played a critical role in educational and reform movements in the United States, Canada, and England, and traces their impact in public and private spaces. Far from being peripheral illustrations of points articulated in written texts or argued in impassioned speeches, these photographs, prints, paintings, exhibitions, magic lantern slides, and films were key components of animal advocacy at the time, both educating the general public and creating a sense of shared identity among the reformers. Uniquely focused on imagery from the early days of the animal rights movement and filled with striking visuals, *Art for Animals* sheds new light on the history and development of modern animal advocacy.

Reading the Animal Text in the Landscape of the Damned Les Mitchell,2019-10-22 *Reading the animal text in the landscape of the damned* looks at the diverse texts of our everyday world relating to nonhuman animals and examines the meanings we imbibe from them. It describes ways in which we can explore such artefacts, especially from the perspective of groups and individuals with little or no power. This work understands the oppression of nonhuman animals as being part of a spectrum incorporating sexism, racism, xenophobia, economic exploitation, and other forms of oppression. The enquiry includes physical landscapes, the law, women's rights, history, slavery, language use, economic coercion, farming, animal experimentation, and much more. *Reading the animal text in the landscape of the damned* is an academic work but is accessible, theoretically based but robustly practical, and it encourages the reader to take this enquiry further for both themselves and for others.
