The Cambridge History of Ireland: Volume 3, 1730-1880 James

Kelly, 2018-02-28 The eighteenth and nineteenth centuries was an era of continuity as well as change. Though properly portrayed as the era of Protestant Ascendancy, it embraces two phases: the eighteenth century when that ascendancy was at its peak and the nineteenth century when the Protestant elite sustained a determined rear guard defence in the face of the emergence of modern Catholic nationalism. Employing a chronology that is not bound by traditional datelines, this volume moves beyond the familiar political narrative to engage with the economy, society, population, emigration, religion, language, state formation, culture, art and architecture, and the Irish abroad. It provides new and original interpretations of a critical phase in the emergence of a modern Ireland that while focused firmly on the island and its traditions, moves beyond the nationalist narrative of the twentieth century to provide a history of late early modern Ireland for the twenty-first century.

Housing, Architecture and the Edge Condition Ellen Rowley, 2018-11-02 This book presents an architectural overview of Dublin's mass housing building boom from the 1930s to the 1970s. During this period, Dublin Corporation built tens of thousands of two-storey houses, developing whole communities from virgin sites and green fields at the city's edge, while tentatively building four-storey flat blocks in the city centre. Author Ellen Rowley examines how and why this endeavour occurred. Asking questions around architectural and urban obsolescence, she draws on national political and social histories, as well as looking at international architectural histories and the influence of post-war reconstruction programmes in Britain, or the symbolisation of the modern dwelling within the formation of the modern nation. Critically, the book tackles this housing history as an architectural and design narrative. It explores the role of the architectural community in this frenzied provision of housing for the populace. Richly illustrated with architectural drawings and photographs from contemporary journals and the private archives of Dublin-based architectural practices, this book will appeal to academics and researchers interested in the conditions surrounding Dublin's housing history.
