## 1st Century Cellists:

**Playing the Cello, 1780-1930** George Kennaway, 2016-04-22 This innovative study of nineteenth century cellists and cello playing shows how simple concepts of posture technique and expression changed over time while acknowledging that many different practices co existed By placing an awareness of this diversity at the centre of an historical narrative George Kennaway has produced a unique cultural history of performance practices In addition to drawing upon an unusually wide range of source materials from instructional methods to poetry novels and film Kennaway acknowledges the instability and ambiguity of the data that supports historically informed performance By examining nineteenth century assumptions about the very nature of the cello itself he demonstrates new ways of thinking about historical performance today Kennaway s treatment of tone quality and projection and of posture bow strokes and fingering is informed by his practical insights as a professional cellist and teacher Vibrato and portamento are examined in the context of an increasing divergence between theory and practice as seen in printed sources and heard in early cello recordings Kennaway also explores differing nineteenth century views of the cello s gendered identity and the relevance of these cultural tropes to contemporary performance By accepting the diversity and ambiguity of nineteenth century sources and by resisting oversimplified solutions Kennaway has produced a nuanced performing history that will challenge and engage musicologists and performers alike

**French Musical Life** Katharine Ellis, 2022 Explicitly or not the historical musicology of post Revolutionary France has focused on Paris as a proxy for the rest of the country This distorting lens is the legacy of political and cultural struggle during the long nineteenth century indicating a French Revolution unresolved both then and now In light of the capital's power as the seat of a centralizing French state which provincials found colonizing and as a cosmopolitan musical crossroads of nineteenth century Europe the struggles inherent in creating sustainable musical

cultures outside Paris and in composing local and regionalist music are ripe for analysis Replacement of France with Paris has encouraged normative history writing articulated by the capital's opera and concert life Regional practices have been ignored disparaged or treated piecemeal This book is a study of French musical centralization and its discontents during the period leading up to and beyond the provincial awakening of the Belle époque The book explains how different kinds of artistic decentralization and regionalism were hard won or not across a politically turbulent century from the 1830s to World War II In doing so it redraws the historical map of musical power relations in mainland France Based on work in over 70 archives chapters on conservatoires concert life stage music folk music and composition reveal how tensions of State and locality played out differently depending on the structures and funding mechanisms in place the musical priorities of different communities and the presence or absence of galvanizing musicians Progressively the book shifts from musical contexts to musical content exploring the pressure point of folk music and its translation into local color for officials who perpetually feared national division Control over composition on the one hand and the emotional intensity of folk based musical experience on the other emerges as a matter of consistent official praxis In terms of French music and its compositional styles what results is a surprising new historiography of French neoclassicism bound into and growing out of a study of diversity and its limits in daily musical life
