It provides information professionals with a practical guide to the design and delivery of such training programmes illustrated with a range of library based examples, checklists and case studies. Many organizations establish projects sometimes using external funding as a means of developing their education and training provision and the book provides a practical overview of this subject in the context of blended learning. Key areas covered include technologies in the classroom, virtual communication tools, integrated learning environments, websites and web tools, models of teaching and learning, planning and designing learning activities, individual and group learning, coaching and mentoring, engaging with communities of interest and practice, managing learning and teaching projects. Readership: This unique book will be of great value to any information professionals involved in establishing and delivering end user education and staff development whatever their previous experience. It will also benefit staff developers in school, college and higher education, library and information students, independent consultants and trainers and information suppliers such as database providers.

Employers will also find this book helpful when supporting staff with revalidation. I found this book very easy to read. It shows clearly how to incorporate revalidation into our practice and make it as stress free as possible. Myrna Melville, Registered Nurse, UK. The book is structured in an accessible way and is designed to really assist registrants through the revalidation process. I particularly like the frequent activities built in as the reader progresses through the chapters. Professor Ian Murray, Head of School of Nursing and Midwifery, Robert Gordon University, UK. This book is a first of its kind and as the title suggests it is a journey where the authors walk with the readers step by step to a successful revalidation destination.
