Genuine Origami Jun Maekawa, 2008 Contains illustrated instructions for creating forty three mathematically based origami models *Mind-Blowing Modular Origami* Byriah Loper, 2016-10-11 Modular origami is the latest craze in paper folding These three dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins to ornate flower like spheres Each piece of paper is held by the tension of the other papers demonstrating the remarkable hidden properties of paper which is at the same time flexible but also strong Author Byriah Loper has been creating modular origami sculptures for just five years but in that time he s pushed the upper limits of the art form with some of the largest most complex geometric paper constructions ever assembled While many geo modular origami artists focus on creating dense floral spheres Byriah has pioneered the open linear wire frame approach which results in a very complex looking model that reveals the interior of its form He exhibits his sculptures annually at the Origami USA convention in New York and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village A great way to learn origami the easy to follow diagrams and step by step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models Each model is a new challenge and the paper sculptures you create look fantastic on your desk or shelf **Fantastic Origami Flying Creatures** Hisao Fukui, 2020-07-28 Japanese origami expert Hisao Fukui shows you how to create incredibly realistic paper birds and flying insects a winged dinosaur and even an undulating Chinese dragon The easy to follow folding instructions and photos in this book present 24 challenging and amazingly lifelike models from intermediate to complex in terms of their level of difficulty The 24 unique models in this book include The Swan The multilayered wings and body give this familiar model a major three dimensional upgrade The Crane Far from traditional this crane rests on its built in platform and has an optional open wing configuration that can double as a fancy box Peacocks One with tail feathers stowed neatly behind and another with its tail fan proudly displayed The Swallow Its distinctive bifurcated tail is on display in a kinetic diving pose The Crested Kingfisher The artfully modeled eye of this hunter appears to be on the lookout for its next meal Stink Bug there s nothing foul about this instantly recognizable shield shaped insect model Beetles A Horned Beetle with unfurled wings and a Rhinoceros Beetle with an intimidating spiky head Flying Chinese Dragon Segmented and supple this ancient symbol of power and good fortune is poised to pounce The Dragonfly This incredibly detailed form is the most challenging model here but the spectacular results are well worth the effort And many more *Advanced Origami* Michael G.
