Astronomers Biographical Dictionary Of Scientists Series:

Astronomers and Cosmologists Dean Miller, 2014-01-01 In this book a breakdown of the life and work of some of history's pioneers in the study of astronomy and cosmology are thoroughly explored This volume provides excellent biographical sketches for trailblazers in the sciences Articles are devoted to specific scientists covering the contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience This historical review includes scientists from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century **A to Z of Scientists in Space and Astronomy** Deborah Todd, Joseph A. Angelo, 2014-05-14 Profiles more than 130 scientists from around the world who made important contributions in the fields of space and astronomy including John Couch Adams Albert Einstein and Plato **The Biographical Dictionary of Scientists**, 1984 *Biographies of Scientists* Roger Smith, 1998 Identifies over 500 sources of information about the lives of scientists for young and adult general readers and for scholars Entries ranging from a quarter to a half page in length explain briefly what the subjects achieved worthy of biography as well as describing the work in some detail The works cited include books encyclopedias and periodicals and both biography and autobiography The arrangement is by discipline the social sciences are not included with indexes by author and subject scientist Annotation copyrighted by Book News Inc Portland OR **Sky Phenomena** Norman Davidson, 2004 *Stories of Astronomers and Their Stars* David E. Falkner, 2021-09-02 This book recounts the stories of the astronomical pioneers who forever changed our views of the cosmos The chapters delve into their fascinating lives over the centuries showing how these pivotal minds built upon the work of their predecessors and unlocked the unique properties of specific stars From ancient astronomy to modern imaging and spectroscopy each tale at once showcases the pace of scientific discovery and the shared passions that drove these starwatchers Accompanying the stories are a plethora of constellation and finder charts stellar coordinates and directions and suggestions for viewing specific stars all of which are visible to the naked eye or through a small telescope In addition the histories on specific star names and designations are given along with an overview of the most popular catalogues and online databases that readers can use for reference The Biographical Dictionary of Women in Science: L-Z Marilyn Bailey Ogilvie, Joy Dorothy Harvey, 2000 Volume 2 of 2 **Astronomers** David Abbott, 1984 Band 4 **Thornton and Tully's Scientific Books, Libraries and Collectors** Andrew Hunter, 2016-12-05 In the 25 years since the last edition of Thornton and Tully's Scientific Books Libraries and Collectors was published scientific publishing has mushroomed developed new forms and the academic discipline and popular appreciation of the history of science have grown apace This fourth edition discusses these changes and ponders the implications of developments in publishing at the end of the twentieth century while concentrating its gaze upon the dissemination of scientific ideas and knowledge from Antiquity to the industrial age In this shift of focus it departs from previous editions and for the first time a chapter on Islamic science is included Recurrent

themes in several of the ten essays in the present volume are the definition of science itself and its transmutation by publishing media and the social context Two essays on the collecting of scientific books provide a counterpoint and the book is grounded on a rigorous chapter on bibliographies The timely publication of *Scientific Books Libraries and Collectors* comes at the coincidence of the advent of electronic publishing and the millennium a dramatic moment at which to take stock

The Palgrave Encyclopedia of Victorian Women's Writing Lesa Scholl, Emily Morris, 2022-12-15 Since the late twentieth century there has been a strategic campaign to recover the impact of Victorian women writers in the field of English literature However with the increased understanding of the importance of interdisciplinarity in the twenty first century there is a need to extend this campaign beyond literary studies in order to recognise the role of women writers across the nineteenth century a time that was intrinsically interdisciplinary in approach to scholarly writing and public intellectual engagement
