Astronomy With A Budget Telescope:

Astronomy with a Budget Telescope Patrick Moore, John Watson, 2013-03-09 Sir Patrick Moore CBE FRS has long been the scourge of those people selling low cost astronomical telescopes via mail order catalogues and non specialist stores Ten years ago the quality was appalling and disappointment would have been almost guaranteed but times have changed and having surveyed some the best and worst of today's inexpensive mail order catalogue and main street astronomical telescopes Patrick has admitted to being astonished by how good some of them are Today the best are now excellent value and useful instruments Part One of *Astronomy With a Mail order Telescope* provides reports on some available models along with detailed and essential hints and tips about what to look for when buying Part Two describes how best to use the telescope which celestial objects to observe with full page star charts to help find them what you can expect to see and how to take and even computer enhance astronomical photographs

Astronomy with a Budget Telescope Patrick Moore, John Watson, 2003 Unlike in the past many of today's inexpensive mail order catalog telescopes provide excellent value and are proving to be useful instruments *Astronomy with a Mail Order Telescope* provides useful information on some of the available models along with detailed and essential hints and tips about what to look for when buying The second part of the book describes how best to use the telescope which celestial objects to observe with full page star charts to help find them what you can expect to see and how to take and even computer enhance astronomical photographs

Astronomy with a Budget Telescope Patrick Moore, John Watson, 2012-03-01 *Astronomy with a Budget Telescope* 2nd Edition is a complete introduction to buying and using a low cost amateur astronomical telescope It provides essential hints and tips about what to look for when buying on a budget the best are now excellent value but they all lack an astronomer's advice about setting them up and using them *Astronomy with a Budget Telescope* was first published in 2003 since then technology has moved on substantially The main factors are first the availability of fairly inexpensive computer controlled go to telescopes which after setting up can automatically locate any celestial objects with reasonable accuracy Second digital cameras have now almost completely displaced wet film cameras and some of them are particularly well suited to astronomical use Third prices are down and quality is up This new edition is revised and extended to include using a low cost go to telescope there are various pitfalls to be avoided and how this class of instrument can make amateur astronomy more accessible to those with limited time at their disposal It also discusses the new breed of mid range digital cameras that include powerful on board processing and image enhancement software that used to be available only to people with advanced astronomical CCD cameras Finally there are detailed reviews and test reports on some of the budget telescopes that are available on Main Street and by mail order

Federal Funding of Astronomical Research National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Space Studies Board, Board on Physics and Astronomy, Committee on Astronomy and Astrophysics, 2000-01-01 The Committee on Astronomy and Astrophysics CAA at its meeting on September 8 1997 was

briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation NSF The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support At its meeting the CAA heard the views of NSF and the National Aeronautics and Space Administration NASA on these issues In consultation with the Board on Physics and Astronomy the Space Studies Board and representatives of NASA and NSF the committee accepted the task of studying three of the questions raised by the House Science Committee HSC It was intended that the results of the study would help guide federal support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee AASC The study would not offer specific funding recommendations but rather would provide a background analysis of the alignment between available resources agency priorities and the vitality of the basic research program Observational Astronomy, and Guide to the Use of the Telescope ...
