At Night:

The Library at Night Alberto Manguel, 2007-10-09 The starting point is a question Alberto Manguel writes in the introduction to *The Library at Night* since few can doubt that the universe is ultimately meaningless and purposeless why do we try to give it order After all our efforts are surely doomed to failure It's hard to think of a more profound or serious subject to start with but *The Library at Night* Alberto Manguel says is by no means a systematic answer Rather it is the story of the search for one In the tradition of *A History of Reading* this book is an account of Manguel's astonishment at the variety beauty and persistence of our efforts to shape the world and our lives most notably through something almost as old as reading itself libraries The result is both intimately personal and incredibly wide ranging it is a fascinating study of the mysteries of libraries a thorough analysis of their history throughout the world and an esoteric enchanting celebration of reading It is perhaps most of all a book that only Alberto Manguel could have written *The Library at Night* begins with the design and construction of Alberto Manguel's own library at his house in western France a process that raises puzzling questions about his past and his reading habits as well as broader ones about the nature of categories catalogues architecture and identity Exploring these themes with a deliberately unsystematic brilliance Manguel takes us to the great Library at Alexandria and Michelangelo's Laurentian Library in Florence we sit with Jorge Luis Borges in his office at the National Library in Argentina travel with donkeys carrying books into the Colombian hinterland and discover the Fihrist a chaotic and delightful bibliographic record of medieval Arab knowledge There seem to be no limits to Manguel's learning or his ability to illuminate his investigations with magical telling details from the past Thematically organized and beautifully illustrated this book considers libraries as treasure troves and architectural spaces it looks on them as autobiographies of their owners and as statements of national identity It examines small personal libraries and libraries that started as philanthropic ventures and analyzes the unending promise and defects of virtual ones It compares different methods of categorization and what they imply and libraries that have built up by chance as opposed to by conscious direction Although it is encyclopedic and discusses encyclopedias assembled by Diderot and fifteenth century Chinese scholars alike and full of concrete historical analysis including a brief investigation of the prejudices underlying the Dewey Decimal System this book is animated throughout by a gentle even playful sensibility it is governed by the browser's logic of association and pleasure rather than the rigid lines of scholarly theory After all everything in a library is connected As the librarians of Alexandria perhaps discovered any single literary moment necessarily implies all others In part this is because this is about the library at night not during the day this book takes in what happens after the lights go out when the world is sleeping when books become the rightful owners of the library and the reader is the interloper Then all daytime order is upended one book calls to another across the shelves and new alliances are created across time and space And so as well as the best design for a reading room and the makeup of Robinson Crusoe's library this book dwells on more nocturnal subjects fictional libraries like

those carried by Count Dracula and Frankenstein's monster shadow libraries of lost and censored books imaginary libraries of books not yet written The Library at Night is a fascinating voyage through the mind of one of our most beloved men of letters It is an invitation into his memory and vast knowledge of books and civilizations and throughout though mostly implicitly it is also a passionate defence of literacy of the unique pleasures of reading of the importance of the book As much as anything else The Library at Night reminds us of what a library stands for the possibility of illumination of a better path for our society and for us as individuals That hope too at the close is replaced by something that fits this personal and eclectic book even better something more fragile and evanescent than illumination though just as important The starting point is a question Outside theology and fantastic literature few can doubt that the main features of our universe are its dearth of meaning and lack of discernible purpose And yet with bewildering optimism we continue to assemble whatever scraps of information we can gather in scrolls and books and computer chips on shelf after library shelf whether material virtual or otherwise pathetically intent on lending the world a semblance of sense and order while knowing perfectly well that however much we'd like to believe the contrary our pursuits are sadly doomed to failure Why then do we do it Though I knew from the start that the question would most likely remain unanswered the quest seemed worthwhile for its own sake This book is the story of that quest from The Library at Night *What's Special at Night?* Daphne Pendergrass, 2015-09-29 Daniel Tiger and his family take a nighttime walk around the neighborhood Effects of Artificial Light at Night on Organisms: From Mechanisms to Function Alejandro Ariel Ríos-Chelén, Davide M.
