Bronze Age Settlement and Land-Use in Thy, Northwest Denmark (Volume 1 & 2) Jens-Henrik Bech, Kristian Kristiansen, Berit Valentin Eriksen, 2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape settlements and

households during the period 1500-1100 BC. Bordering the North Sea to the west and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research, pollen and palaeobotanical analyses with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for students and researchers of the Bronze Age alike.

Hunters in a Changing World International Union of Prehistoric and Protohistoric Sciences. Commission XXXII, 2004. This volume presents the proceedings of the Workshop of the UISPP Commission XXXII held at Greifswald in 2002, which focused on man's reaction to the dramatic climatic and subsequent environmental change that marked the end of the Pleistocene and the beginning of the warmer Holocene. Focusing on northern and central Europe, contributors discuss the types of changes that took place in vegetation, fauna and landscape across this region before looking at specific case studies. These examine, for example, the problems of dating environmental deposits or bone artefacts. Sites discussed include Lundby and Bornholm in Denmark, Norregård in the Polish plain, Kreis Schleswig-Flensburg in Germany, the Havelland in northern Germany and Italy. A final study examines evidence from this transitional period further afield, on the Japanese islands. All papers are in English.
