Pursuing Women's Economic Empowerment International Monetary Fund. Strategy, Policy, & Review Department, International Monetary Fund. African Dept., 2018-05-31 The economic and social imperative for women's economic empowerment is clear Greater gender equality boosts economic growth and leads to better development outcomes It contributes to reducing income inequality and boosting economic diversification and in turn supports economic resilience Gender equality is one of the 17 global UN Sustainable Development Goals which provide a roadmap for ending poverty protecting the planet and ensuring that all people enjoy peace and prosperity The G7 has emphasized the need for closing the gender gap The Taormina Leaders Summit in 2017

renewed the emphasis on promoting women's empowerment which the leaders see as a crucial contribution to promoting sustainable development. In this regard, leaders committed to mainstreaming gender equality into all their policies. This is carried forward by Canada's G7 Presidency. With growing recognition that gender equality promotes economic stability and growth, the IMF has scaled up its work in this area and is committed to continue these efforts. Work by the IMF will focus on i) deepening its understanding of the economic benefits of women's empowerment both in the labor market and through more equal opportunities for boys and girls also against the background of persistent megatrends including in an environment of rapid technological change ii) integrating the analysis into Fund policy dialogue with member countries iii) providing customized assistance workshops and peer learning courses in areas such as gender budgeting and iv) expanding collaboration with other international institutions on the subject to benefit from complementary areas of expertise. **A**

Comparative Perspective of Women's Economic Empowerment Meltem Yenilmez, Onur Celik, 2019-05-29 The need for the creation of an enabling political, legal and economic environment for women within Turkey is rising. A growing concern is shown at the ethnic divisions and local discrimination against women which have spilled over into the labor market. This book lends a supporting voice to the economic and social empowerment of women globally, focusing on the real causes and the unpredictable nature of the ongoing conflicts surrounding the issue. The authors bring to the forefront problems of development within various regions and the implementation of projects which address the state of women inequality and risks that are inimical to their participation in the economy. Emphasis is laid on why women should be permitted access to the many opportunities in information technology and exchange, partnership, growth and networking in this digital era. The oppressive policies of Turkey are scrutinized to unravel the dangers they pose to the corporate existence of women in the modern world. Furthermore, this book centers on the deliberation on regional politics and issues on gender and women's empowerment in modern Turkey whilst comparing with other countries. The work sheds light on salient issues and possible remedies within target countries and the concerted efforts made to create a reliable structure to discuss gender conflicts. Ample contributions from countries such as the US, Germany, Serbia, South Africa and United Kingdom are pivotal to comparing and examining the main debates. Addressing several global gender-related examples as well as Turkey's national principles, this book encourages full involvement of women and girls in deciding the fate of their country. This book serves as the rallying point of an array of informative and mind-expanding works of literature in regional studies, gender studies, migration, economy and area studies in countries like Turkey, USA, Serbia, UK and India. Experts, students and readers in the academic sphere may find this work educative and intellectually fulfilling. **Women in the World Economy** Susan P. Joekes, 1987 Until now there has been little coordinated research on the role of women in the economics of developing countries or on the impact of the international economy on women in those countries. This study, specially commissioned by the United Nations International Research and Training Institute for the Advancement of Women (INSTRAW), examines women

who are engaged in what is defined as gainful or wage earning employment and also considers the role of women in unpaid labor such as household work farm work on their own land and other activities that require managing resources
