Airpower Against An Army:

Airpower against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard William F. Andrews, Colonel Andrews concentrates on tactical innovation during war He examines the extent to which USAF doctrine prepared the US Central Command Air Forces CENTAF for its mission against the Republican Guard Forces Command RGFC He describes how CENTAF adjusted air operations against Iraq's RGFC in the 1990-91 invasion of Kuwait CENTAF instituted six significant tactical innovations in one week that required its aviators to create new tactics in the midst of combat operations Colonel Andrews evaluates those innovations because they enabled CENTAF to satisfy theater objectives He recommends that the Air Force identify means to measure air operations against land forces during peacetime because the press of war does not provide time for reflection and analysis *Airpower Against An Army* William F. Andrews, 1998

For nearly two decades the United States Air Force USAF oriented the bulk of its thinking acquisition planning and training on the threat of a Soviet blitzkrieg across the inter German border The Air Force fielded a powerful conventional arm well rehearsed in the tactics required to operate over a central European battlefield Then in a matter of days the 1990 invasion of Kuwait altered key assumptions that had been developed over the previous decade and a half The USAF faced a different foe employing a different military doctrine in an unexpected environment Instead of disrupting a fast paced land offensive the combat wings of the United States Central Command Air Forces CENTAF were ordered to attack a large well fortified and dispersed Iraqi ground force The heart of that ground force was the Republican Guard Forces Command RGFC CENTAF's mission dictated the need to develop an unfamiliar repertoire of tactics and procedures to meet theater objectives How effectively did CENTAF adjust air operations against the Republican Guard to the changing realities of combat Answering that question is central to this study and the answer resides in evaluation of the innovations developed by CENTAF to improve its operational and tactical performance against the Republican Guard Effectiveness and timeliness are the primary criteria used for evaluating innovations **Airpower Against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard** Lt Col Usaf William F Andrews, USAF, William F., William Andrews, Lt. , USAF, 2012-08-25

In January and February 1991 Central Command Air Forces CENTAF conducted an air to ground onslaught against Iraq's Republican

Guard The requirements of this operation conflicted in a number of respects with the US Air Force's extended preparations for conflict on a European battleground. A major case in point involved the low altitude tactics CENTAF crews had practiced for the previous decade and a half, tactics that were manifestly unsuited for the task that confronted them in Iraq. Colonel Andrews's study, *Airpower against an Army Challenge and Response*, in CENTAF's *Duel with the Republican Guard* examines how CENTAF adjusted air operations against the Republican Guard to meet the realities of combat. As he makes clear, four factors proved instrumental in facilitating CENTAF's rapid adaptation to the realities of war: 1. air superiority, which created a permissive environment for innovative tactics; 2. open-minded attitudes of senior commanders, which nurtured the growth of new methods of operation; 3. the faith of senior commanders in highly motivated and well-trained subordinates, which permitted and inspired lower echelon units to find optimal solutions to complex problems in minimum time; and 4. the high degree of personal initiative cultivated on training and tactics ranges in classrooms at Nellis Air Force Base, Nevada, and flight briefing rooms across the USAF, which served as the ultimate sine qua non of the adaptation process. Colonel Andrews's study also serves to powerfully reaffirm the fundamental truth of the old Air Force adage that flexibility is the key to airpower. As we confront an uncertain international security environment, a fundamental lesson of *Airpower against an Army* is that we must encourage flexibility in peacetime if we are to possess the physical, mental, and organizational agility that will be required to master the unforeseen realities of the next war.

Airpower Advantage Diane Therese Putney, 2004. American air power is a dominant force in today's world. Its ascendancy, evolving in the half century since the end of World War II, became evident during the first Gulf War. Although a great deal has been written about military operations in Desert Shield and Desert Storm, this deeply researched volume by Dr. Diane Putney probes the little-known story of how the Gulf War air campaign plan came to fruition. Based on archival documentation and interviews with USAF planners, this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around-the-clock basis. The tension among air planners is palpable as Dr. Putney traces the incremental progress and friction along the way. The author places the complexities of the planning process within the context of coalition objectives. All the major players are here: President George H. W. Bush, General H. Norman Schwarzkopf, General Colin Powell, General Chuck Horner, and Secretary of Defense Richard Cheney. The air planning process generated much debate and friction but resulted in great success: a 43-day conflict with minimum casualties. Dr. Putney's rendering of this behind-the-scenes evolution of the planning process, in its complexity and even suspense, provides a fascinating window into how wars are planned and fought today and what might be the implications for the future.

C. R. Andereggs Director of Air Force History, [The Influence of Air Power Upon History](#) Walter J. Boyne, 2022-12-21. A comprehensive, balanced overview of war in the air from a world-renowned authority on aviation history and New York Times bestselling author. Booklist: *The Influence of Air Power Upon History* makes a startlingly new analysis of the far-reaching implications flight has had on warfare, politics, diplomacy, technology, and mass

culture Author Walter Boyne examines the application of air power from the very earliest days of the balloon down to the current era of space warfare and postulates some new and controversial theories that are certain to arouse comment Where Alfred Thayer Mahan s classic work *The Influence of Sea Power Upon History* catalogues the elements that made naval prowess a determinant of a nation s strength *The Influence of Air Power Upon History* traces the development of air power philosophy by examining the theory and practice of air power as it is exercised in both war and peace The author unerringly depicts the contributions made by the people and planes of each era some of them famous some virtually unknown but all vitally important He highlights the critical competence of individuals at every step of the way comparing the works of Guilio Douhet William Mitchell John Warden and others philosophically even as he compares the combat capabilities of leaders such as Hugh Trenchard Bomber Harris Herman Goering Curtis LeMay and Henry Hap Arnold Boyne s views on World War II bombings and air power in the Vietnam War will please many readers and perhaps shock many others *The Influence of Air Power Upon History* is an important book for the public and for the military and is destined to be hotly debated for years to come *Readings on the Functions of Military Air Power* ,1957 **Air Power and Armies** Sir John Cotesworth Slessor,2009-08-31 An account of Sir John Cotesworth Slessor 1897 1979 one of Great Britain s most influential airmen Sir John Slessor played a significant role in building the World War II Anglo American air power partnership as an air planner on the Royal Air Force Staff the British Chiefs of Staff and the Combined Chiefs of Staff He coordinated allied strategy in 1940 41 helped create an Anglo American bomber alliance in 1942 and drafted the compromise at the Casablanca Conference that broke a deadlock in Anglo American strategic debate Slessor was instrumental in defeating the U boat menace as RAF Coastal Commander and later shared responsibility for directing Allied air operations in the Mediterranean Few aspects of the allied air effort escaped his influence pilot training aircraft procurement and dissemination of operational intelligence and information all depended to a degree on Slessor His influence on Anglo American operational planning paved the way for a level of cooperation and combined action never before undertaken by the military forces of two great nations Military Air Power in Europe Preparing for War Norman Ridley,2023-01-24 The First World War had seen the mechanization of warfare Battle fronts had become immobilized in the grip of machine guns and heavy artillery leading to slaughter on an unprecedented scale The end of the war saw exhausted governments extricating themselves from the carnage but some leaders were concerned that sooner or later another major war would follow As France s Marshal Foch put it the Treaty of Versailles was only a twenty year truce The overriding concern was to find ways in future of avoiding the kind of static battle fronts that had consumed so many in such futile efforts Military aviation was seen as the one great innovation that had the potential to do this by revolutionizing warfare It would not only augment the effectiveness of ground forces in a tactical role but it also had the means of reaching out strategically beyond the battlefronts to strike at the enemy s trade supplies communications and industrial production All through the war military aviation had been firmly under the control of army

commanders but there was soon a fierce debate over the way it should develop. The development of an air doctrine within each of the major European powers was fraught with difficulty as the nascent air arms struggled with varying degrees of success to free themselves from army control to find a new independent identity. This book examines the way in which these air arms competed for prominence within the military structures of six major European nations: Germany, Britain, France, Soviet Union, Poland, and Italy, with different resources, ambitions, and philosophies in the years from the beginning of aviation right up to the start of the Second World War.

Airpower Against an Army William F. Andrews, 2008-02-01

In January and February 1991, Central Command Air Forces (CENTAF) conducted an air-to-ground onslaught against Iraq's Republican Guard. The requirements of this operation conflicted in a number of respects with the US Air Force's extended preparations for conflict on a European battleground. A major case in point involved the low altitude tactics CENTAF crews had practiced for the previous decade and a half: tactics that were manifestly unsuited for the task that confronted them in Iraq. This paper was originally submitted as a thesis by Maj. (now lieutenant colonel) William F. Andrews to the faculty of Air University's School of Advanced Airpower Studies for completion of graduation requirements, academic year 1995-96. Colonel Andrews's study, *Airpower against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard*, examines how CENTAF adjusted air operations against the Republican Guard to meet the realities of combat. Initial F-16 and B-52 attacks on the Republican Guard met little success. In response, CENTAF instituted six significant tactical innovations in the space of one week: A-10 deep interdiction, A-10 reconnaissance, F-16 killer scout operations, F-16 forward basing, F-111 and F-15E tank plinking, and the use of cockpit videotape as a source for bomb damage assessment. These innovations required CENTAF aviators to create new tactics in the midst of combat operations. Quickly devised and implemented, these new tactics markedly improved CENTAF's effectiveness against the Republican Guard. Critically weakened by air attack, the two guard divisions that stood and fought were annihilated during the ground phase of Operation Desert Storm. As Colonel Andrews makes clear, four factors proved instrumental in facilitating CENTAF's rapid adaptation to the realities of war: 1) air superiority, which created a permissive environment for innovative tactics; 2) open-minded attitudes of senior commanders, which nurtured the growth of new methods of operation; 3) the faith of senior commanders in highly motivated and well-trained subordinates, which permitted and inspired lower echelon units to find optimal solutions to complex problems in minimum time; and 4) the high degree of personal initiative cultivated on training and tactics ranges in classrooms at Nellis Air Force Base, Nevada, and flight briefing rooms across the USAF, which served as the ultimate *sine qua non* of the adaptation process. Colonel Andrews's study also serves to powerfully reaffirm the fundamental truth of the old Air Force adage that flexibility is the key to airpower. As we confront an uncertain international security environment, a fundamental lesson of *Airpower against an Army* is that we must encourage flexibility in peacetime if we are to possess the physical, mental, and organizational agility that will be required to master the unforeseen realities of the next war.
