Coworking Spaces Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i.e. self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies The aims of this collection are twofold First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated A narrative that does not emphasize entrepreneurship or coworking as the epitome of the

neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships

The New Normal of Working Lives

Stephanie Taylor,Susan Luckman,2017-12-06 This critical international and interdisciplinary edited collection investigates the new normal of work and employment presenting research on the experience of the workers themselves The collection explores the formation of contemporary worker subjects and the privilege or disadvantage in play around gender class age and national location within the global workforce Organised around the three areas of creative working digital working lives and transitions and transformations its fifteen chapters examine in detail the emerging norms of work and work activities in a range of occupations and locations It also investigates the coping strategies adopted by workers to manage novel difficulties and life circumstances and their understandings of the possibilities trajectories mobilities identities and potential rewards of their work situations This book will appeal to a wide range of audiences including students and academics of the sociology of work and labor history and those interested in understanding the implications of the new normal of work and employment

Place-Based Spaces for Networked Learning Lucila Carvalho,Peter Goodyear,Maarten de Laat,2016-07-01 With the boundaries of place softened and extended by digital communications technologies learning in a networked society necessitates new distributions of activity across time space media and people and this development is no longer exclusive to formally designated spaces such as school classrooms lecture halls or research laboratories Place based Spaces for Networked Learning explores how qualities of physical places make both formal and informal education in a networked society possible Through a series of investigations and case studies it illuminates the structural composition and functioning of complex learning environments This book offers a wealth of key design elements and attributes for productive learning that educational designers can reuse in multiple contexts The chapters examine how places are modified expanded or supplemented by networking technologies and practices in order to create spaces in which learners can collaboratively develop new understandings connections and capabilities Utilizing a range of diverse but complementary perspectives from anthropology archaeology architecture geography psychology sociology and urban studies Place based Spaces for Networked Learning addresses how material places and digital spaces are understood how sense can be made of new assemblages and configurations of tasks tools and people how the real time analysis of new flows of data can inform and entertain users of a space and how access to the digital realm changes our experiences with both places and other people **Moving Abroad**
