The Best in Children's Books University of Chicago. Center for Children's Books, 1986-08 Designed to aid adults parents teachers librarians in selecting from the best of recent children s literature this guide provides 1 400 reviews of books published between 1979 and 1984 This volume carries on the tradition established by Zena Sutherland s two earlier collections covering the periods from 1966 to 1972 and 1973 to 1978 Her 1973 edition of The Best in Children s Books was cited by the American School Board Journal as one of the outstanding books of the year in education

Sociobiology: Sense or Nonsense? M. Ruse, 2012-12-06 In June 1975 the distinguished Harvard entomologist Edward O Wilson published a truly huge book entitled Sociobiology The New Synthesis In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via insects lower invertebrates mammals and primates right up to and including our own species Homo sapiens Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves The Science for the People Sociobiology Study Group Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant First not only were Wilson s ideas attacked but he himself was smeared by being linked with the most reactionary of political thinkers including the Nazis

An Analysis of Richard Dawkins's The Selfish Gene Nicola Davis, 2017-07-06 Richard Dawkins provides excellent examples of his reasoning and interpretation skills in The Selfish Gene His 1976 book is not a work of original research but instead a careful explanation of evolution combined with an argument for a particular interpretation of several aspects of evolution Since Dawkins is building on other researchers work and writing for a general audience the central elements of good reasoning are vital to his book producing a clear argument and presenting a persuasive case organising an argument and supporting its conclusions In doing this Dawkins also employs the crucial skill of interpretation understanding what evidence means clarifying terms questioning definitions giving clear definitions on which to build arguments The strength of his reasoning and interpretative skills played a key part in the widespread acceptance of his argument for a gene centred interpretation of natural selection and evolution

V. Falger,2012-12-06 1 1 THE STUDY OF CONFLICT Polemos Pantoön Pater Heraclitus Conflict on all levels of organic
existence is pervasive persistent ubiquitous Conflict is the universal experience of all life forms Organisms are bound in
multiple conflict configurations and coalitions which have their own dynamic and their own logic This does not mean however
that the more paroxysmal forms of conflict behaviour naked violence and destruction are also universal Conflict and
cooperation are always intertwined Conflicts do however have a propensity to gravitate towards violence There is as Pettman
1975 pointed out no accepted or agreed list of the social units by which conflicts might be classified To talk of conflict in
intra personal inter personal familial group class ethnic religious intra state or inter state terms is to assume perhaps
erroneously that each kind of social unit having its own range of size structure and institutions will also have its own modes
of interaction and thus its own patterns of conflict with other social units Fink 1968 like and unlike itself Such an assumption
merits scrutiny on its own since despite the plausibility of some sort of analytical link between the parties to a conflict and
the nature of the confrontation that ensues the link should be demonstrated and not allowed to stand by assertion alone This
volume is devoted to one type of analysis of conflict the socio biological one Subject Catalog Library of Congress,1981
