Animal Neighbours

Martin Saxer, J. Zhang

Animal Neighbours:

No Safe Place/Animal Neighbors, 2003 A space shuttle lands on planet Thork looking for a spacecraft that crash landed four days earlier *Animal neighbours* explores compost pile tree and garage habitats and introduces some of the animals that live in these places *Just Fodder* Josh Milburn, 2022-07-19 Animal lovers who feed meat to other animals are faced with a paradox perhaps fewer animals would be harmed if they stopped feeding the ones they love Animal diets do not raise problems merely for individuals To address environmental crises health threats and harm to animals we must change our food systems and practices And in these systems animals too are eaters Moving beyond what humans should eat and whether to count animals as food *Just Fodder* answers ethical and political questions arising from thinking about animals as eaters Josh Milburn begins with practical dilemmas about feeding the animals closest to us our pets or animal companions The questions grow more complicated as he considers relationships with more distance questions about whether and how to feed garden birds farmland animals who would eat our crops and wild animals Milburn evaluates the nature and circumstances of our relationships with animals to generate a novel theory of animal rights Looking past arguments about what we can and cannot do to other beings *Just Fodder* asks what we can should and must do for them laying out a fuller range of our ethical obligations to other animals **Animal Contests** Ian C. W. Hardy, Mark Briffa, 2013-05-30 Contests are an important aspect of the lives of diverse animals from sea anemones competing for space on a rocky shore to fallow deer stags contending for access to females Why do animals fight What determines when fights stop and which contestant wins Addressing fundamental questions on contest behaviour this volume presents theoretical and empirical perspectives across a range of species The historical development of contest research the evolutionary theory of both dyadic and multiparty contests and approaches to experimental design and data analysis are discussed in the first chapters This is followed by reviews of research in key animal taxa from the use of aerial displays and assessment rules in butterflies and the developmental biology of weapons in beetles through to interstate warfare in humans The final chapter considers future directions and applications of contest research making this a comprehensive resource for both graduate students and researchers in the field Our Animal Neighbors Matthieu Ricard, Jason Gruhl, 2020-09-01 Winner of the Moonbeam Children's Animals Pets Non Fiction Gold Medal A story about the fundamental connection between animals and people and how we can treat all of Earth's creatures with compassion and empathy Furry polar bears playful sea otters slow sloths prickly porcupines and slimy snakes are just a few of the many animals we share our world with And even though we might not look the same or have the same needs as our animal neighbors we have more in common with them than we might think *Our Animal Neighbors* introduces children to the importance of treating all animals with the care and compassion they deserve We all want to experience love safety and respect and this book is the first step to instilling those values at an early age This planet is our home and we should all be free to live a prosperous life regardless of whether we have hands hooves scales or fur A serious message

delivered with humor simplicity and charm makes this book an excellent purchase for families that value open ended discussions Also a good resource for classrooms and libraries that welcome diverse opinions and points of view School Library Journal **Animal World** ,1911 **On Animals** David L. Clough,2018-12-27 This book presents an authoritative and comprehensive survey of human practice in relation to other animals together with a Christian ethical analysis building on the theological account of animals which David Clough developed in On Animals Volume I Systematic Theology 2012 It argues that a Christian understanding of other animals has radical implications for their treatment by humans with the human use and abuse of non human animals for food the most urgent immediate priority Following an introduction examining the task of theological ethics in relation to non human animals and the way it relates to other accounts of animal ethics this book surveys and assess the use humans make of other animals for food for clothing for labour as research subjects for sport and entertainment as pets or companions and human impacts on wild animals The result is both a state of the art account of what humans are doing to other animals and a persuasive argument that Christians in particular have strong faith based reasons to acknowledge the significance of the issues raised and change their practice in response The Art of Neighbouring Martin Saxer,J. Zhang,2025-10-01 For the nations on its borders the rapid rise of China represents an opportunity but it also brings worry especially in areas that have long been disputed territories of contact and exchange This book gathers contributors from a range of disciplines to look at how people in those areas are actively engaging in making relationships across the border and how those interactions are shaping life in the region and in the process helping to reconfigure the cultural and political landscape of post Cold War Asia **The Oxford Handbook of Animal Studies** Linda Kalof,2017-02-01 Intellectual struggles with the animal question how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s Over the next forty years scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time paying special attention to the commodification of animals the degradation of the natural world and a staggering loss of animal habitat and species extinction and the increasing need for humans to coexist with other animals in urban rural and natural contexts Linda Kalof maps these themes into the five major categories that structure this volume Animals in the Landscape of Law Politics and Public Policy Animal Intentionality Agency and Reflexive Thinking Animals as Objects in Science Food Spectacle and Sport Animals in Cultural Representations and Animals in Ecosystems Written by international scholars with backgrounds in philosophy law history English art sociology geography archaeology environmental studies cultural studies and animal advocacy the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings Tourism, Heritage and Commodification of Non-human Animals: A Posthumanist Reflection Álvaro López López,Gino Jafet Quintero Venegas,Carol Kline,2023-12-19 Heritage is a

social construction rooted in modern and contemporary societies It is commonly a positive assessment of many elements of the physical and human environment e g ecosystems and landscapes monuments customs gender norms religious practices gastronomy and livelihoods Heritage and tourism are strongly related to each other in that heritage gives rise to tourist attractions and activities and tourism enhances the designation of heritage sites A post humanist perspective the moral valuation of equality between humans and other animals demands that both are sentient beings and self aware of their pain and pleasure Thus the involvement of animals as heritage elements by themselves or as an element of tourist consumption in heritage sites implies their commodification and lack of agency As such these practices are usually unethical since they threaten the animals primary interests not to suffer not to feel pain and to be able to live their freedom This book contains chapters that reveal both the unethical interactions between humans and animals within heritage tourism and those that show experiences in which efforts are made to minimize damage within the commercialization of animals involved as heritage themselves

On Animals: Systematic Theology David L. Clough, 2012-02-02 The first book length study of the place of animals in systematic theology
