Animal Agriculture Fuller W. Bazer, G. Cliff Lamb, Guoyao Wu, 2019-10-25 Animal Agriculture Sustainability Challenges and Innovations discusses the land based production of high quality protein by livestock and poultry and how it plays an important role in improving human nutrition growth and health With exponential growth of the global population and marked rises in meat consumption per capita demands for animal source protein are expected to increase 72% between 2013 and 2050 This raises concerns about the sustainability and environmental impacts of animal agriculture An attractive solution to meeting increasing needs for animal products and mitigating undesirable effects of agricultural practices is to enhance the efficiency of animal growth reproduction and lactation Currently there is no resource that offers specific knowledge of both animal science and technology including biotechnology for the sustainability of animal agriculture for the expanding global demand of food in the face of diminishing resources This book fills that gap giving readers all the necessary information on important issues facing modern animal agriculture namely its sustainability challenges and innovative solutions Integrates new knowledge in animal breeding biotechnology nutrition reproduction and management Addresses the urgent issue of sustainability in modern animal agriculture Provides practical solutions on how to solve the current and future problems that face animal agriculture worldwide

Whittemore,2023-09-04 Animal farming is a readable thought provoking honest and unstuffy account of what really happens on Europe s and Britain s animal farms and how animal farming came to be that way Stories behind modern farming practices are revealed and concerns are raised over how our farms will look in the future Fascinating insights and unpalatable questions are presented into the ways that animals are often wrongly fed bred housed and managed Learning comes from failures so the book is more about failures than successes The author combines well researched facts with well found experience He commends and condemns in equal measure often in unexpected ways A broad range of subjects is covered in the book What domestication now means for farm animals How selective breeding has changed them for better and worse The mixed blessings of government support and subsidisation The story of abuse of animals rights and welfare is dealt with in detail as are ideas of respect and compassion and the inadequate ways in which animals are fed The author describes a broken marketing system for livestock products and also considers organic farming Lastly in the present environment of agricultural upheaval in Europe how can science and technology take animal farming forward What are the chances of the wrongs being righted what will tomorrow s farmed animals be for Science of Animal Agriculture Ray V.
