Animal Orientation and Navigation ; Papers Symposium on Animal Orientation and Navigation (1970 : Wallops Station),1972 *Animal Orientation and Navigation* Robert M. Storm,1967 *Animal Orientation and Navigation* Robert M. Storm,1966 **Orientation and Navigation in Vertebrates** Andrii Rozhok,2008-06-25 This book reviews all major models and hypotheses concerning the mechanisms supposed to underlie the process of navigation in vertebrates It covers data on all major model groups of vertebrates studied in the context of animal navigation such as migratory birds homing pigeons sea turtles subterranean mammals and some migratory fish species Some other less studied groups e g whales have also been touched The first part of the book describes different sources of navigational information with their specific navigational mechanisms known or supposed to be employed by animals for navigational goals The second part discusses possible functions of these mechanisms in different vertebrates and in the context of different navigational tasks ranging from short range navigation often performed by animals within as small an area as several square meters to long distance global scale migrations performed by many birds and some sea turtles during their lifespan *Animal Migration* D. J. Aidley,1981-10-30 *Animal Orientation and Navigation ; Proceedings* Robert M. Storm,1967 **ANIMAL ORIENTATION AND NAVIGATION. 1967** OREGON STATE UNIV. .1966 BIOL. COLLOQUIUM. 27TH, **Avian Navigation** F. Papi,H. G. Wallraff,2012-12-06 Right from the start of this century field observations and the patient ringing of birds have made available a growing mass of data on the breeding and resting areas of migratory species and on the course period and duration of their seasonal flights Considered as a whole this work on migration morphology commands admiration and when view ed in detail it reveals fascinating insights into the extraordinary naviga tional performances of many bird species which find their way over enormous distances Yet only a few dozen physiologists are actively trying to answer the question of how these performances are achieved Experimental work on migratory birds raises many difficulties some of them insuperable so that many researchers carry out their experiments on the homing pigeon which is constantly motivated by homesickness and ready to display its ability to flyaway home Many of the problems connected with bird navigation are still un solved but a rapidly growing body of results is being produced along with a variety of new ideas and approaches A clear majority of the stu dents of bird navigation met in September 1981 in Tirrenia a seaside resort on the Tyrrhenian coast where each of them offered new in sights into his or her recent investigations Their contributions have been connected in this volume which provides an up to date conspec tus of the stage reached by research in this field *Animal Orientation and Navigation* ,1972 *Animal Orientation and Navigation* ,1967
