Behavior and Sociobiology A.B. Chiarelli,Robert Corruccini,2012-12-06 The VIIIth International Congress of the International Primatological Society was held from 7 through 11 July 1980 in Florence Italy under the auspices of the host institution the Istituto di Antropologia of the University of Florence More than 300 papers and abstracts were presented either at the main Congress or in 14 pre Congress symposia the week earlier so scheduled to avoid conflicting with either the main invited lectures or the contributed paper sessions This volume consists of the contributed papers concerning primate behavior with special emphasis on those social aspects that reflect on or affect primate biology Clearly this is one of the more important and popular subdisciplines in primatology today We have thus restricted the subject in agreement with the

publishers in order to ensure a successful and useful volume that is likely to be generally noticed and widely available as these up to date contributions deserve Furthermore we have compiled this volume in a fairly new way for congress proceedings In view of space limitations and the need to guarantee a high quality and sufficiently specialized book we subjected all manuscripts to a four level internal review process and selected only the best 23 of the 50 submissions We favored natural observation work over captive studies This rejection rate of 54% exceeds that of almost all reviewed scholarly journals

Singapore Biodiversity Peter K. L. Ng, Richard Corlett, Hugh T. W. Tan, 2011 This volume refers to the natural environment of Singapore and describes more than 40 000 non microbial species of organisms that make up the island s biodiversity

Death and Life of Nature in Asian Cities Anne Rademacher, K. Sivaramakrishnan, 2021-09-10 Death and Life of Nature in Asian Cities explores the encounter between two processes that are unfolding in diverse patterns across Asia the rapid urbanization of Asia across big cities smaller towns and the newest urban concentrations and the contentious debates and novel schemes by which nature is figured and emplaced in cities and their conurbations Contemporary Asian cities displace nature by causing its death and withering but also embrace it through acts of renewal and the pursuit of sustainability Contributors in this volume gather case studies from across Asia to address projects of urban greening and reimagining nature in urban life The book illustrates how the intersection of urban growth and urban nature is a place rich with fresh ideas about urban planning governance and social life This book illuminates a continuing process of discovery and regeneration through which urban natures may well be moving from taken for granted infrastructures to more consciously experienced sites of interplay between non human life and materials and daily human life experiences Debates and efforts to recover nature in the city provoke moral and ethical evaluations of the human ecology of city life and direct ecologies of urbanism into new avenues like aesthetics care perception and stewardship This fascinating collection of essays brings together a series of cutting edge insights into Asian cities caught in the maelstrom of global environmental change A particular strength of this book is its commitment to forms of interdisciplinary dialogue and conceptual engagement that unsettle existing geographies of knowledge

Matthew Gandy University of Cambridge author of *Natura Urbana Ecological Constellations in Urban Space* This impressive collection on urban ecologies moves beyond the anthropocentric city to expand our understanding of cities as multispecies spaces of active collaboration decay and regeneration offering new possibilities for the flourishing of urban life both human and non human and the design of more just and sustainable cities for all
