Elmevik, Gun Widmark, 2002 Annotation This handbook is conceived as a comprehensive history of the North Germanic
languages from the oldest times up to the present day Whereas most of the traditional presentations of Nordic language
history are confined to individual languages and often concentrate on purely linguistic data the present work covers the
history of all Nordic languages in its totality embedded in a broad culture historical context The Nordic languages are
described both individually and in their mutual dependence as well as in relation to the neighboring non Nordic languages
The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism
encompassing all aspects of actual methodology Moreover it combines diachronic with synchronic systematic aspects
longitudinal sections with cross sections periods such as Old Norse transition from Old Norse to Early Modern Nordic Early
Modern Nordic 1550 1800 and so on The description of Nordic language history is built upon a comprehensive collection of
linguistic data it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and
English speaking countries The organization of the handbook combines a central part on the detailed chronological
developments and some chapters of a more general character chapters on theory and methodology in the beginning and on
overlapping spatio temporal topics in the end **Årskatalog för svenska bokhandeln** ,1881 **Personhistorisk**
