Experimental Methods for Social Policy Research George W. Fairweather, Louis G. Tornatzky, 2013-10-22 *Experimental Methods for Social Policy Research* explains how experimental methods can be used in social policy research to help solve contemporary human problems and to preserve and improve the world s physical and social climates This book argues that scientists can make a major contribution to the solution of social problems by aiding the society in incorporating scientific methods into the social decision making process Two principal methods required for solving social problems are highlighted methods for evaluating social models aimed at solving particular problems and methods for disseminating those models that are beneficial to the state the region and the nation This book is comprised of 14 chapters and begins with the argument that contemporary social policy decision making is inadequate for the late 20th and 21st centuries It then defines the basic ingredients for an adequate social policy decision making apparatus and explains how it can be accomplished The next chapter outlines the basic parameters of social models and dissemination processes from a conceptual point of view The remaining chapters describe general experimental procedures from the inception of the ideas to the implementation of social models found to be beneficial The final chapter is reserved for a discussion of a proposed center for experimental social innovation that would provide research and training This monograph will be a valuable resource for social scientists and researchers as well as social policymakers public officials and citizens who are committed to the improvement of living conditions for all members of society

Psychology of the Americas Manuel Ramirez, 2013-10-22 *Psychology of the Americas Mestizo Perspectives on Personality and Mental Health* presents the framework for a personality psychology and psychiatry of the Americas This framework is based on the mestizo world view a

perspective that emerged from sociopolitical events which are unique to the development of many of the nations of the Americas. The word *mestizo* refers to the synthesis of native American and European people cultures and life styles. This book is divided into nine chapters and starts with a discussion of the concepts and principles of developmental personality, community and clinical psychology, psychiatry, which are reflected in the cultures of the indigenous peoples of North and South America as well as the Caribbean. Considerable chapters offer some models that are based on the paradigms of diversity and synthesis, specifically a values belief systems cognitive styles framework based on research that has explored the relationship between traditionalism, modernism and cognitive styles. The specific models focus on individual development of pluralistic identities, the mental health of families coping with acculturation stress, person environment fit of migrating individuals who are mismatched with institutions and agencies of the community and on intergroup and international relations in situations of conflict. The remaining chapters deal with the tenets and assumptions of a psychology and psychiatry including theories and approaches which differ in many respects from the European world view based personality psychology and psychiatry of the past. Covert Conditioning Dennis Upper, Joseph R. Cautela, 2013-09-03. Covert Conditioning deals with covert conditioning procedures, the rationale underlying their use and their potential application either singly or in combination to a variety of clinical problems. Each procedure's most representative use in clinical practice is described and results of experimental analogue studies as well as reports of promising breakthroughs in the application of covert conditioning techniques to new clinical problems are discussed. A broad range of target behaviors, clinical settings and client populations is also examined. This book is comprised of 36 chapters and opens with an overview of the theoretical background of covert conditioning and evidence to support its basic underlying assumptions. Each of the next six chapters introduces one of the major covert conditioning techniques: covert sensitization, covert reinforcement, covert negative reinforcement, covert extinction, covert modeling and covert response cost, and presents experimental analogue evidence if available of its efficacy. The use of each procedure in treating a number of clinical target behaviors is also discussed. The final section describes the clinical application of combinations of covert conditioning techniques to a variety of problems. This monograph will be a useful resource for psychologists and behavioral therapists.

Environmental Design and Human Behavior Leonard Krasner, 2013-10-22. Environmental Design and Human Behavior: A Psychology of the Individual in Society outlines the fundamental principles that govern the concept of environmental design in the context of human behavior. The first part of the text deals with theoretical and historical influences of environmental design along with the ethical and value context. The selection also covers methods for assessments of environment and interactionists' approach to environmental design. The next part details the application of environmental design; this part tackles topics such as environmental design in the classroom, designing an ideal classroom and implementation process and personal experience. The book will be of great use to behavioral scientists, sociologists,

community health and social workers and professionals involved in the designing of environment such as city planners
