Swartz,D.N. Perkins,2016-07-15 Originally published in 1990 this title attempts to provide for the educational practitioner an overview of a field that responded in the 1980s to a major educational agenda This innovative agenda called for teaching students in ways that dramatically improved the quality of their thinking Its context is a variety of changes in education that brought the explicit teaching of thinking to the consciousness of more and more teachers and administrators Developing Models in Science Education J.K. Gilbert,C. Reiss,2023-08-24 Science education particularly school science education has long had an uneasy relationship with ethics being unsure whether to embrace ethics or leave it to others In this book the authors argue that while the methods of science and of ethics are very different ethics plays a key role in how science is undertaken and used And so ethics has a central place in science education whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet books magazines TV and radio or in places such as hospitals and zoos Written for science educators based in schools and elsewhere the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have Empowered with the knowledge shared in this book readers will feel confident about the place that ethics has in science education The authors provide a rich array of examples as to how science education both in school and out of school and for all ages can be enhanced through including teaching about ethics
