Brockett, Roger Hiemstra, 2018-11-13 Originally published in 1991 this book provides the reader with a comprehensive synthesis of developments issues and practices related to a self direction in learning it presents strategies for facilitating self directed learning as an instructional method and for enhancing learner self direction as an aspect of adult personality The idea of self directed learning is not a new one but has received renewed attention in education circles and has particular significance for the adult education sector      **Adult Education as Theory, Practice and Research** Robin Usher, Ian Bryant, 2014-06-23 The authors argue that the aim of research should be to improve practice through a process of critical reflection Focusing clearly on the everyday concerns and problems of practitioners they emphasize the importance of practical knowledge Their definition of practice is wide and includes the generation of theory and the doing of research as well as front line teaching They show how notions of adult learning and the adult learner have been constituted mainly through theory and research in psychology and sociology and examine action research as a mode of understanding They conclude by looking at the curriculum implications for the teaching of adult education as reflective practice      Understanding and Facilitating Adult Learning Stephen D.
