Law and Sustainable Development After COVID-19 Augustine Edobor Arimoro, Ezinne Mirian Igbokwe, Tamaraudoubra Tom Egbe, 2024-06-18 This book considers the impact of the COVID-19 pandemic on the realisation of the United Nations Sustainable Development Goals. Although efforts towards the attainment of the Sustainable Development Goals are ongoing, the COVID-19 pandemic has had a significant impact on these efforts, accentuating inequities as well as absorbing resources. This book addresses this impact as it takes up the question of how to ensure global recovery in line with the target for the Sustainable Development Goals after the pandemic. Adopting an interdisciplinary approach but focusing particularly on the role of law and legal frameworks in this recovery, the book considers the effect of the pandemic on key industries such as shipping, insurance, manufacturing, and banking, as well as on the role of the State and non-State actors. Pursuing an explicitly Global South perspective, the book maintains that in the post-COVID era, it is the elaboration of a rule of law framework that is in sync with both the Global North and South that is crucial if the Sustainable Development

Handbook of Sustainable Apparel Production Subramanian Senthilkannan Muthu, 2015-04-28 A hot button societal issue, sustainability has become a frequently heard term in every industrial segment. Sustainability in apparel production is a vast topic and it has many facets. *Handbook of Sustainable Apparel Production* covers all aspects of sustainable apparel production including the raw materials employed, sustainable manufacturing processes. **Textiles, Identity and Innovation: Design the Future** Gianni Montagna, Cristina Carvalho, 2018-10-03 *D_TEX* presents itself as a starting point at a crossroads of ideas and debates around the complex universe of Textile Design in all its forms, manifestations and dimensions. The textile universe allied to mankind since its beginnings is increasingly far from being an area of exhausted possibilities; each moment proposing important innovations that need a presentation, discussion and maturation space that is comprehensive and above all, inter and transdisciplinary. Presently, the disciplinary areas where the textile area is present are increasing and important, such as fashion, home textiles, technical clothing and accessories but also construction and health among others, and can provide new possibilities and different disciplinary areas, allowing the production of new knowledge. *D_TEX* proposes to join the thinking of design with technologies, tradition, techniques and related areas in a single space where ideas are combined with the technique and with the projectual and research capacity, thus providing for the creation of concepts, opinions, associations of ideas, links and connections that allow the conception of ideas, products and services. The interdisciplinary nature of design is a reality that fully reaches the textile material in its essence and its practical application.
