Thottathil,2014-10-01 Should you buy organic food Is it just a status symbol or is it really better for us Is it really better for the environment What about organic produce grown thousands of miles from our kitchens or on massive corporately owned farms Is local or small scale better even if it s not organic A lot of consumers who would like to do the right thing for their health and the environment are asking such questions Sapna Thottathil calls on us to rethink the politics of organic food by focusing on what it means for the people who grow and sell it what it means for their health the health of their environment and also their economic and political well being Taking readers to the state of Kerala in southern India she shows us a place where the so called Green Revolution program of hybrid seeds synthetic fertilizers and rising pesticide use had failed to reduce hunger while it caused a cascade of economic medical and environmental problems Farmers burdened with huge debts from buying the new seeds and chemicals were committing suicide in troubling numbers Farm laborers suffered from pesticide poisoning and rising rates of birth defects A sharp fall in biodiversity worried environmental activists and everyone was anxious about declining yields of key export crops like black pepper and coffee In their debates about how to solve these problems farmers environmentalists and policymakers drew on Kerala s history of and continuing commitment to grassroots democracy In 2010 they took the unprecedented step of enacting a policy that requires all Kerala growers to farm organically by 2020 How this policy came to be and its immediate economic political and physical effects on the state s residents offer lessons for everyone interested in agriculture the environment and what to eat for dinner Kerala s example shows that when done right this kind of agriculture can be good for everyone in our global food system *Organic Gardening For Beginners*

Timothy Tripp,2014-11-25 Previously the concept of organic gardening was limited to have some green place in the house to sit and enjoy the evening tea or to enhance the aesthetic feel of one s home office etc Organic gardening was taken in the context of breeding flowers and trees only This field was also limited to the people who were gardener by profession or who have had just little time or interest to give their place a natural look or ambient However in the current time the concept of gardening is totally revised The people have started their own organic gardening business or farms even in urban areas In current technological advancement the farming has turned into making more profit and for it the chemicals are commonly utilized to kill pesticides and to increase production **Organic Farming** Agrihortico Cpl,2024-10-05 According to the

International Federation of Organic Agriculture Movements IFOAM Organic agriculture is a production system that sustains the health of soils eco systems and people It relies on ecological processes biodiversity and cycles adapted to local conditions rather than the use of inputs with adverse effects Organic agriculture combines tradition innovation and science to benefit the shared environment and promote fair relationships and a good quality of life for all involved According to FAO Food and Agriculture Organization Organic is a claim on the production process rather than a claim on the product itself This book
