Build Your Own Solar Panel System In 2020 René Voss, 2020-01-02 The use of microinverters specifically Enphase Energy IQ Series practically makes a solar panel electrical system plug and play leaving challenges to mechanical design permitting sourcing components mostly from RES Supply <http://tinyurl.com/y7h2559k> and installation This practical step by step guide helps you build the type

of system that will most universally work on the majority of North American homes If you do your own home repairs you already possess many of the skills needed to build a solar power system Any remaining skills and basic knowledge about solar can be learned which is the subject of this guide This guide is best viewed as an eBook because it includes many hyperlinks to view offline documents installation guides videos and even component pricing Hyperlinks may not work in certain versions of Kindle Reader so tinyurl links to external websites and videos are also provided AUTHOR S BIORen Voss lives in San Anselmo CA where he practices Natural Resources Law for non profits and serves on the Town of San Anselmo s Open Space Committee He is a past member of the Sierra Club Board of Directors 1999 2001 and an avid outdoorsman In 1986 he received his undergraduate degree in Electrical Engineering and much later in 2008 graduated from Concord Law School and was admitted to practice law in California He is a renewable energy advocate environmental activist and electric vehicle enthusiast He designed sourced and built his first photovoltaic system in the spring of 2018 which is the subject of this guide and he acquired his first electric vehicle in the same year His hope is that this guide will make a small contribution toward helping accelerate our world s transition from fossil fuel consumption towards a renewable and sustainable future
