[Vietnam's Rapid Economic Development](#) Pham Khanh Nam, Almas Heshmati, 2024-10-02 This book offers an up to date and comprehensive picture of the Vietnamese economy which is the fast growing economy in Southeast Asia The country has invested heavily in education health and development infrastructure across the country Progress in recent decades has been strong and Vietnam has attracted significant relocation and outsourcing of production from OECD countries In recent years

much of the withdrawn foreign direct investment from China is channeled to Vietnam. The state's development policy has created optimal conditions for further expansion of production, supply chain, education, and finances. Investment in education, health, infrastructure, administration, and regulations is facilitating investment inflows, technology transfer, and spillover to the growing national companies. The educated young population and disciplined labor force have provided a strong basis for the growth in the economy. The high level of productivity, improved quality of products, low and competitive cost of production, and more than 100 million people provide a strong base for a continued economic growth. This edited volume is written by the professional young educated and active entrepreneurial generation with good insights into the features of the economy and its development potential. They provide an up-to-date view and empirical research-based picture of the recent trends in Vietnam's economic development. The target audience are educators, undergraduate and graduate students, domestic and foreign investors, government agencies, provincial and industrial sector decision makers, trade partners, libraries, individual researchers, and professional and practitioners. This book helps to fill the gap in knowledge and inform development planners and investors about different sectors of the Vietnamese economy and its development potential.

Trends and Applications in Mechanical Engineering, Composite Materials and Smart Manufacturing Padhi, Surya Narayan, 2024-08-14. The fields of Mechanical Engineering, Composite Materials, and Smart Manufacturing find themselves at the heart of a pivotal predicament. As these industries grapple with the demands for efficiency, sustainability, and innovation, a need arises for a unified exploration of the transformative solutions within these domains. At this crucial moment, researchers, academics, and practitioners worldwide need to focus on understanding and solving the complex issues that are hindering progress. *Trends and Applications in Mechanical Engineering, Composite Materials and Smart Manufacturing* delves into solutions that propel industries, economies, and societies into a future defined by progress and resilience. At its core, this book strives to examine the disciplines of mechanical engineering, composite materials, and smart manufacturing. With the collaborative efforts of diverse experts, it attempts to create a comprehensive resource that not only identifies emerging trends but also unveils their impact on the real world. By acting as a driving force for advancing current research, bridging knowledge gaps, and presenting innovative solutions, the publication contributes significantly to the collective understanding of these disciplines. The goal is to empower scholars, educators, and professionals with the knowledge and insights required to sculpt the future of these increasingly complex industries.
