Advanced Technical Ceramics:

Advanced Technical Ceramics Shigeyuki Somiya, 2012-12-02 Advanced Technical Ceramics provides a thorough overview of technical ceramics. This book is divided into three parts encompassing 13 chapters that cover all aspects of technical ceramics including definitions, raw materials, electronic and mechanical materials and processes, and biomaterials. Part I deals with the classification of ceramics by their chemical composition, mineral content, processing and production methods, properties and uses. This part also includes the synthetic raw materials, production processes and thermo-mechanical properties of ceramics. Part II describes the electrical, electronic, magnetic, thermal, chemical and optical properties of ceramics as well as their biomedical applications. Part III focuses on several precision machining methods for ceramics such as cutting, grinding, lapping, polishing and laser processing. Ceramics scientists, engineers and researchers will find this text invaluable. *Advanced Technical Ceramics Directory and Databook* Robert John Hussey, Josephine Wilson, 2012-09-08 Advanced Technical Ceramics Directory and Databook is a world wide directory of the properties and suppliers of advanced technical ceramic material used in or proposed for numerous engineering applications. The information is subdivided into sections based on the class of ceramic e.g. Nitrides, silicon nitride, sialon, boron carbide, aluminium nitride etc. Each section consists of a short introduction, a table comparing basic data and a series of data sheets. The book adopts standardised data in order to help the reader in finding and comparing different data and identifying the required information. It is designed to complement the existing Chapman Hall publications on high performance materials.
