Advanced Age Geriatric Care Nages Nagaratnam,Kujan Nagaratnam,Gary Cheuk,2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management **ABC of Geriatric Medicine** Nicola Cooper,Kirsty Forrest,Graham Mulley,2013-05-31 Demographic trends confirm what clinicians already know they are spending increasing amounts of time dealing with older people This new ABC provides an introduction to the new and increasing challenges of treating older patients in a variety of settings ABC of Geriatric Medicine provides an overview of geriatric medicine in practice Chapters are written by experts and are based on the specialty geriatric medicine curriculum in the UK ABC of Geriatric Medicine is a highly illustrated informative and practical source of knowledge with links to further

information and resources It is an essential guide where management of the ageing population is a major health issue for hospital and family doctors students nurses and other members of the multi disciplinary team *Geriatric Medicine* M.S. John Pathy,Paul Finucane,2012-12-06 Medical care of the elderly today challenges the practitioner to break away from narrow diagnostic labelling and view the whole picture of disease in old age In an excellent problem oriented approach Geriatric Medicine offers a complete overview for practitioners The main portion of the text deals with the common diseases of old age important aspects such as physiology demography and health care delivery are discussed in separate chapters Social and legal aspects in the major English speaking countries receive adequate attention All of the contributors have at some time been connected with the University Department of Geriatric Medicine in Cardiff and attest to a positive and dynamic approach in geriatric medicine an approach that has international validity and relevance *Geriatric Medicine* Gideon Caplan,2014-07-01 Geriatric medicine is one of the youngest medical specialities in Australia but is also one of the fastest growing Geriatric medicine offers a more holistic approach to patient care than organ based internal medicine sub specialities Patient centred interventions aim to allow the patient to function optimally This textbook has been designed to inspire and inform students of geriatric medicine about the science and art of aged care The book is structured to follow how geriatric medicine clinicians approach patients who present with geriatric syndromes and must be assisted by systems of care In an introductory part overviews are provided of the biology of ageing comprehensive geriatric assessment the cornerstone of geriatric medicine practice multidisciplinary teamwork and community services for older people in Australia In the second part of the book over 13 chapters detailed coverage is provided of the geriatric syndromes the so called geriatric giants immobility incontinence instability and impaired intellect In the third part of the book over 10 chapters Care in context care of older people in general practice and in residential aged care facilities rehabilitation acute and post acute care end of life issues legal aspects of geriatric medicine for example is the focus geriatric medicine is placed within the Australian health care system Individual chapters are written by specialist contributors Case studies illustrate key points about assessment and management Inclusion of three poems by H W Longfellow W B Yeats and Dylan Thomas will enable readers to feel the heart within geriatric medicine Australasian medical students junior hospital doctors working in geriatric medicine and other members of aged care teams specialist nurses physiotherapists occupational therapists social workers etc will find in this book a succinct readable and authoritative introduction to the principles and practice of geriatric medicine
