Advances In Haemapheresis:

Advances in haemapheresis C.Th. Smit Sibinga, L. Kater, 2012-12-06 The first International Meeting on Apheresis was held in Dyon in 1984 At the congress it became clear that both the technical and therapeutic sides developed very rapidly and it appeared fruitful to bring together the investigators of the different countries working in the areas At that time immunology had come to pervade many clinical specialities and hemapheresis especially plasmapheresis was considered a therapeutic tool in many immunological diseases which hitherto had proved to be fatal New methods to identify certain antibodies and circulating immune complexes in the serum and the possibilities to remove them from the blood by several techniques filtration centrifugation immunoabsorption led to an almost uncontrolled use of plasma exchange in a variety of diseases Since then the technical possibilities of this technique were further recognized as was the impact of immunology on many diseases and the possibilities to collect specific components for therapeutic purposes But also we became aware of the limited contributions of anecdotal data on successes or failures of apheresis as adjuvant treatment Therefore international prospective studies were initiated to make critical assessment possible of apheresis in various diseases Advances in haemapheresis Cees Smit Sibinga, L. Kater, 1991-07-31 The first International Meeting on Apheresis was held in Dyon in 1984 At the congress it became clear that both the technical and therapeutic sides developed very rapidly and it appeared fruitful to bring together the investigators of the different countries working in the areas At that time immunology had come to pervade many clinical specialities and hemapheresis especially plasmapheresis was considered a therapeutic tool in many immunological diseases which hitherto had proved to be fatal New methods to identify certain antibodies and circulating immune complexes in the serum and the possibilities to remove them from the blood by several techniques filtration centrifugation immunoabsorption led to an almost uncontrolled use of plasma exchange in a variety of diseases Since then the technical possibilities of this technique were further recognized as was the impact of immunology on many diseases and the possibilities to collect specific components for therapeutic purposes But also we became aware of the limited contributions of anecdotal data on successes or failures of apheresis as adjuvant treatment Therefore international prospective studies were initiated to make critical assessment possible of apheresis in various diseases Advanced Membrane Technology and Applications Norman N Li, Anthony G. Fane, W. S. Winston Ho, Takeshi Matsuura, 2011-09-20 Advanced membranes from fundamentals and membrane chemistry to manufacturing and applications A hands on reference for practicing professionals Advanced Membrane Technology and Applications covers the fundamental principles and theories of separation and purification by membranes the important membrane processes and systems and major industrial applications It goes far beyond the basics to address the formulation and industrial manufacture of membranes and applications This practical guide Includes coverage of all the major types of membranes ultrafiltration microfiltration nanofiltration reverse osmosis including the recent high flux and low pressure membranes and anti fouling membranes

membranes for gas separations and membranes for fuel cell uses Addresses six major topics membranes and applications in water and wastewater membranes for biotechnology and chemical biomedical applications gas separations membrane contractors and reactors environmental and energy applications and membrane materials and characterization Includes discussions of important strategic issues and the future of membrane technology With chapters contributed by leading experts in their specific areas and a practical focus this is the definitive reference for professionals in industrial manufacturing and separations and research and development practitioners in the manufacture and applications of membranes scientists in water treatment pharmaceutical food and fuel cell processing industries process engineers and others It is also an excellent resource for researchers in industry and academia and graduate students taking courses in separations and membranes and related fields

Trigger Factors in Transfusion Medicine C.Th. Smit Sibinga, P.C. Das, E.L. Snyder, 2012-12-06 It is an honour and a pleasure to welcome you all at this 20th annual International Symposium on Blood Transfusion in the Netherlands This year you celebrate its 20th anniversary and I congratulate the Staff of the Blood Bank Noord Nederland and especially Dr Smit Sibinga for this great achievement As most of you know the name of the person of Dr Smit Sibinga is unbreakably connected with the annual symposium in Groningen which he has organized each year from the very start 20 years ago The reputation of any symposium depends heavily on the quality of the lectures I think it is not possible to organize 20 symposia in a row if the topics lack actual relevance and the speakers are not of excellent reputation Dr Smit Sibinga has proven to have a keen eye for selecting interesting themes and eminent speakers Although a lot of different topics have been dealt with in the past 20 years which each attracted the attention of a different group in the field of blood transfusion it is not surprising that after a tradition of 20 years several speakers but also a lot of attendees are not for the first time in Groningen to participate in this event It gives the symposium a unique atmosphere of intimacy It is not hard to admit that most of the newer developments in transfusion medicine take place outside the Netherlands

Cellular Engineering and Cellular Therapies C.Th. Smit Sibinga, L.F.M.H. de Leij, 2013-03-09 Welcome to the City of Groningen the center of the North of the Netherlands Groningen is proud of the long lasting tradition of scientific symposia organised by the Sanquin Blood Bank These Sanquin International Symposia on Blood Transfusion have become a true traditional event in Groningen marking the early academic year and have contributed to the specific reputation of Groningen and its University in the scientific field of Transfusion Medicine The growing tradition has also contributed to initiatives of both University Province and the City of Groningen to bring science and industry together BioMedCity Groningen Such reputation does not just happen but is the result of creative and scientific leadership of vision and an open mind to explore in a team spirit horizons Groningen is particularly proud of this reputation thanks to its leadership the Sanquin Blood Bank North East This year in particular the theme chosen some two years ago is extremely timely as it illustrates the activities and scientific interest of an integrated team which includes our regional Sanquin Blood Bank North East and fits in the City initiatives

within the concept of BioMedCity Groningen *Good Manufacturing Practice in Transfusion Medicine* C.Th. Smit Sibinga, P.C. Das, H.J. Heiniger, 2012-12-06 TQM AND TAYLORISM HOW THEY COMPARE H Bremer Preface The industrial world today is divided between two camps a culture based on the principles of Total Quality Management TQM developed in the Far East and one still strongly influenced by the origins of Scientific Management introduced in the West by F W Taylor and others at the turn of the century This divergence will be shown to have arisen in the last forty years long enough for a new generation of managers and corresponding culture to emerge The two cultures are so deeply entrenched that it is difficult for one to change to the other However there is strong evidence to support the contention that people oriented TQM is superior and those companies clinging to Taylor models now face difficult decisions Actions by Taylor companies to move to TQM might well be hindered rather than helped by applying present Quality Assurance Standards developed by Taylor oriented national and international Standards Institutions **Coagulation and Blood Transfusion** C.Th. Smit Sibinga, P.C. Das, P.M. Mannucci, 2012-12-06 With great pleasure I welcome you to the City of Groningen In more than one way there is cause for celebration Today marks the third lustrum of the annual international symposium on blood transfusion organized by the Rode Kruis Bloedbank Groningen Drenthe In my opinion it has been a remarkable initiative of the Bloedbank to start organizing a scientific conference as it did in 1976 It meant among others that in case of success the initiative would grow to be an annual item on the international congress calendar It also meant that a possible third lustrum would coincide with the celebration of the 950th anniversary of the City of Groningen I am happy to note that the initiative has been successful over the past fourteen years the Rode Kruis Bloedbank Groningen Drenthe has succeeded in organizing an annual symposium on blood transfusion with a different theme each year and with an average attendance of 250 participants from some 26 countries world wide The platform created with the special formula of the symposium for science and industry has been well balanced and beneficial to both Mr Chairman ladies and gentlemen I like to compliment the organizers with the success that they have attained Allow me to mention the name of just one person in whom I like to thank everyone who has been involved in creating the annual Bloedbank symposia my warm congratulations to Dr Smit Sibinga and his staff Transmissible Diseases and Blood Transfusion Cees Smit Sibinga, Roger Y. Dodd, 2002-09-30 This book is the only published literature that comprehensively discusses all aspects of transfusion of transmissible diseases the facts and the fiction It is of paramount importance to all involved in the vein to vein chain of transfusion medicine Transmissible Diseases and Blood Transfusion is an important reference for all hematologists and researchers involved in transfusion medicine Immunobiology of Transfusion Medicine George Garratty, 1993-09-21 Describes the immunological aspects of blood transfusion medicine examining the immuno chemistry of blood group antigens the immune destruction of cells correlations between blood groups and disease and the effect transfusion induced retroviral infection has on immune response Transfusion Medicine: Quo Vadis? What Has Been Achieved, What Is to Be Expected C.Th. Smit Sibinga, J.D. Cash, 2012-12-06 It is a great pleasure for

me to open the jubilee 25 International Symposium on Blood Transfusion here in Groningen This symposium is co sponsored by the World Health Organization and is being held under the auspices of the ISBT and the Secretary General of the Council of Europe Mr Walter Schwimmer The patronage was granted with great pleasure for several reasons First of all Dutch experts are very active in our Committees and have largely contributed in developing the Council of Europe principles in the blood area Secondly the Council of Europe is active today in the area of blood transfusion due to a tragic event which occurred in 1953 in the Netherlands following a flooding many of the blood products given for assistance could not be used due to incompatibilities and differences in labelling Some words to present the Council of Europe since the organisation is sometimes confused with institutions of the European Union The organisation has been founded in 1949 to establish the principles of democracy and rule of law all over Europe Since 1989 the year of the fall of the Berlin wall and the opening up of the iron curtain these principles could be extended to the countries of Central and Eastern Europe Today this makes the Council of Europe the only pan European organisation with 41 Member States thus representing more than 750 million people
