The encyclopedia is alphabetically organized and consists of principal articles covering key disciplinary areas such as sports economics and sports history, large topical entries on central subjects such as resistance training and the diagnosis of sports injuries, smaller topical entries on subjects such as cross training and projectile motion, short overviews of other important terms and concepts from metabolism and motivation to muscle tension length relationship. With over 150 contributing authors from the US, UK, Canada, Australia, South Africa, Japan, New Zealand, Hong Kong and continental Europe, the *Encyclopedia of International Sports Studies* is an unparalleled work of sports scholarship. Accessibly written, facts fronted and including full cross referencing and guides to further reading throughout, this is an essential addition to the bookshelf of any student, researcher, teacher or professional working in sport. *Sport and Exercise Psychology* Aidan Moran, 2004-08-02. Aidan Moran provides the first textbook to combine an explanation of the theoretical foundations of sport and exercise psychology with critical reviews of contemporary research and practical suggestions for relevant independent research projects. **Advances in Applied Sport Psychology**, *Measurement, Statistics, and Research Design in Physical Education and Exercise Science: Current Issues and Trends* Terry M. Wood, 2014-06-03. This inaugural issue is devoted to exploring measurement, research design and statistics issues in six subdisciplines of exercise and sport science. Originally presented at the Eighth Measurement and Evaluation Symposium, all papers in this issue reflect the work of many renowned measurement specialists and content experts in their respective fields. The articles discuss the following topics: standards of assessment quality for physical educators and the problem of providing adequate assessment without adequate resources; the importance of properly conceptualizing and defining appropriate research questions as the source and solution for measurement and design issues in reference to motor learning, control and sport and exercise psychology; the study of individuals, single subject and other small sample designs in contrast to the more traditional study of

groups and the importance of computing and reporting statistical power in research
