Acts Of Magic:

Acts of Magic Cassie Miles, 1986 **Magic in the Biblical World** Todd Klutz, 2004-03-01 The category magic long used to signify an allegedly substantive type of activity distinguishable from religion has nearly been dismantled by recent historical and social scientific approaches to religious studies While recognising and at times reinforcing this stance the essays in this collection show that there is still much to be learned about the cultural context of early Judaism and Christianity by analysing ancient texts which either use magic as a category for purposes of deviance labelling or promote behaviour of a broadly magico religious variety Through sustained engagement with texts ranging from Exod 7 9 and Acts 8 to the Testament of Solomon and the Late Antique alchemical treatise known as the Cyranides this volume focuses chiefly on materials that challenge the familiar boundaries between miracle and magic and medicine yet it also heightens awareness of the way unsuspecting use of a sick sign e g magic can impede critical understanding of texts and their respective contexts of production and reception Journal for the Study of the New Testament Supplement Series Volume 245 A Kind of Magic Michael Labahn, L. J. Lietaert Peerbolte, 2007-01-01 This collection explores the importance of magic within Early Christianity

The Magic Of Make Believe Lloyd Leon,2025-04-12 Imagination is a wondrous gift that lives inside each of us waiting to be unleashed It is the colorful spark that transforms ordinary moments into extraordinary adventures When we close our eyes and let our minds wander we can soar through the skies like a bird dive into the depths of the ocean like a daring explorer or even become a brave knight defending a kingdom This power to create worlds from mere thoughts is what makes life so magical Unfortunately as we grow older many of us forget how to tap into this incredible ability often losing touch with the dreams and beliefs that once brought us joy

Maidens, Magic and Martyrs in Early Christianity Jan N. Bremmer,2017-07-13 In this work Jan N Bremmer aims to bring together the worlds of early Christianity and those of ancient history and classical literature worlds that still all too rarely interlock Contextualising the life and literature of the early Christians in their Greco Roman environment he focusses on four areas A first section looks at more general aspects of early Christianity the name of the Christians their religious and social capital prophecy and the place of widows and upper class women in the Christian movement Second the chronology and place of composition of the early apocryphal Acts of the Apostles and Pseudo Clementines are newly determined by paying close attention to their doctrinal contents but also innovatively to their onomastics and social vocabulary The author also analyses the frequent use of magic in the Acts and explains the prominence of women by comparing the Acts to the Greek novel Third an investigation into the theme of the tours of hell suggests a new chronological order shows that the Christian tours were indebted to both Greek and Jewish models and illustrates that in the course of time the genre dropped a large part of its Jewish heritage The fourth and final section concentrates on the most famous and intriguing report of an ancient martyrdom the Passion of Perpetua It pays special attention to the motivation and visions of Perpetua which are analyzed not by taking recourse to modern theories such as psychoanalysis but by looking to the world in which Perpetua lived both Christian and pagan It is only by seeing the early Christians in their ancient world that we might begin to understand them and their emerging communities Publisher s description

Guide to the Study of Ancient Magic David Frankfurter,2019-03-19 In the midst of academic debates about the utility of the term magic and the cultural meaning of ancient words like *mageia* or *khesheph* this Guide to the Study of Ancient Magic seeks to advance the discussion by separating out three topics essential to the very idea of magic The three major sections of this volume address 1 indigenous terminologies for ambiguous or illicit ritual in antiquity 2 the ancient texts manuals and artifacts commonly designated magical or used to represent ancient magic and 3 a series of contexts from the written word to materiality itself to which the term magic might usefully pertain The individual essays in this volume
