

BASIC LEGAL RESEARCH TECHNIQUES

Ideally, this chapter will serve as a guide for public librarians assisting users who have legal reference questions. However, it may also be useful for students and others who are interested in doing legal research on their own. Public librarians might note that, in many ways, a library user seeking legal information is no different from any other library user. Librarians use the same reference skills to assist users seeking legal information as they do to assist users seeking information about, for instance, history or biology.

Still, finding and using legal resources can be tricky. In terms of access, the good news is that much primary law (cases, statutes, regulations, local ordinances, and related government information) is available online. There are also a number of free Web sites, some maintained as a public service by law schools, which provide an abundance of legal information, at least as directories. These sites typically organize and define the law in terms that are easy to understand. They also provide links to primary sources, which can be helpful to public librarians and their users seeking authoritative information related to legal questions. Nonetheless, because a general knowledge of the print publications helps one to understand and navigate online resources, this chapter also covers traditional print resources.
