Basic Ideas Reconsidered Progress In Self Psychology:

Progress in Self Psychology: Basic ideas reconsidered Arnold Goldberg, 1985 *Progress in Self Psychology, V. 15*
Arnold I. Goldberg, 2013-06-17 Volume 15 of Progress in Self Psychology conveys the rich pluralism of contemporary self psychology with respect to a central theoretical and clinical issue the nature of the self and the manner in which it can best be studied This topic is initially addressed through a series of papers reassessing selfobject transferences and the selfobject function of interpretation It is then approached via the theory of psychoanalytic technique with papers that focus on boundaries and intimacy and on Surface Depth and the Isolated Mind And it culminates in two case studies that elicit animated discussion delineating different perspectives intersubjective motivational systems and self selfobject on the self in relation to the therapeutic process Two studies comparing Melanie Klein and Heinz Kohut a discussion of how current cultural attitudes affect parenting a relational view of the therapeutic partnership and an integration of Silvan Tomkins affect theory with self psychology add breadth to this timely and provocative collection Volume 15 includes additional letters from the Kohut Archives and a moving account of Kohut's struggle with his own impending death Progress in Self Psychology, V. 19 Mark J. Gehrie, 2013-05-13 The contributors to Explorations in Self Psychology volume 19 of the Progress in Self Psychology series wrestle with two interrelated questions at the nexus of contemporary discussions of technique How authentic and relationally invested should the self psychologically informed analyst be and what role should self disclosure play in the treatment process The responses to these questions embrace the full range of clinical possibilities Dudley and Walker argue that empathically based interpretation precludes self disclosure whereas Miller argues in favor of authentic self expression and against the self psychologist's frustrating attempt to decenter from frustration or anger Consideration of the utility of a consistently empathic stance continues with Weisel Barth's clinical presentation and the discussions that it elicits about management of her patient's primary destructiveness Lenoff's critical rereading of Kohut's Examination of the Relationship Between Mode of Observation and Theory and Rieveschl's self psychological work with adolescents and Neville Symington's theory of narcissism Contributions to applied analysis explore topics as diverse as an exchange of dreams between John Adams and Benjamin Rush Mann's Death in Venice the films of Ingmar Bergman psychotherapy of the elderly and disabilities in the sensory motor integration in children And Volume 19 concludes with Constance Goldberg's candid and enlightening reminiscence of Heinz Kohut a very complex man with whom to be in a relationship *Progress in Self Psychology, V. 17* Arnold I. Goldberg, 2013-05-13 Volume 17 of Progress in Self Psychology The Narcissistic Patient Revisited begins with the next installment of Strozier's From the Kohut Archives first publication of a fragment by Kohut on social class and self formation and of four letters from his final decade Taken together Hazel Ipp's richly textured Case of Gayle and the commentaries that it elicits amount to a searching reexamination of narcissistic pathology and the therapeutic process This illuminating reprise on the clinical phenomenology Kohut associated with narcissistic personality disorder accounts for the

volume title The ability of modern self psychology to integrate central concepts from other theories gains expression in Teicholz's proposal for a two tiered theory of intersubjectivity in Brownlow's examination of the fear of intimacy and in Garfield's model for the treatment of psychosis The social relevance of self psychology comes to the fore in an examination of the experience of adopted children and an inquiry into the roots of mystical experience both of which concern the ubiquity of the human longing for an idealized parent imago Among contributions that bring self psychological ideas to bear on the arts Frank Lachmann's provocative Words and Music which links the history of music to the history of psychoanalytic thought in the quest for universal substrata of psychological experience deserves special mention Annette Lachmann's consideration of empathic failure among the characters in Shakespeare's Othello and Silverstein's reflections on Schubert's self states and selfobject needs in relation to the specific poems set to music in his Lieder round out a collection as richly broad based as the field of self psychology itself

Progress in Self Psychology, V. 13 Arnold I. Goldberg, 2013-05-13 Volume 13 provides valuable examples of the very type of clinically grounded theorizing that represents progress in self psychology The opening section of clinical papers encompasses compensatory structures facilitating responsiveness repressed memories mature selfobject experience shame in the analyst and the resolution of intersubjective impasses Two self psychologically informed approaches to supervision are followed by a section of contemporary explorations of sexuality Contributions to therapy address transference and countertransference issues in drama therapy an intersubjective approach to conjoint family therapy and the subjective worlds of profound abuse survivors A concluding section of studies in applied self psychology round out this broad and illuminating survey of the field

Progress in Self Psychology, V. 20 William J. Coburn, 2013-07-04 Transformations in Self Psychology highlights the manner in which contemporary self psychology has become in the words of series editor William Coburn a continuing series of revolutions within a revolution Of special note are contributions that explore the bidirectional influences between self psychology and other explanatory paradigms The volume begins with Stern's thoughtful attempt to integrate self psychological and relational perspectives on transference countertransference enactments Fosshage and Munschauer's presentation of a case of extreme nihilism and aversiveness elicits a series of discussions that constructively highlights divergent perspectives on the meaning and role of enactment in treatment and on the so called empathy authenticity dichotomy The productive exploration of theoretical differences also enters in the redefinition of notions of gender and sexuality a topic of increasing interest to self psychologists Differing perspectives which give rise to differing clinical emphases emerge in the exchanges of Clifford and Goldner and of VanDerHeide and Hartmann The special contextualist demands of work with intercultural couples foster a more integrative sensibility with self psychological borrowings from interpretive anthropology and attachment theory Clinical contributors to Volume 20 explore manifestations of a tension that permeates all analytic work that between the patient's newly emerging ability to expand the self in growth consolidating ways and the countervailing dread to repeat Enlarged by Malin's personal reflections of Fifty

Years of Psychoanalysis and by book review essays focusing on the writings of Lachmann and Stolorow respectively

Transformations in Self Psychology bespeaks the continuing vitality of contemporary self psychology **Progress in Self Psychology, V. 14** Arnold I. Goldberg, 2013-05-13 Volume 14 of Progress in Self Psychology The World of Self Psychology introduces a valuable new section to the series publication of noteworthy material from the Kohut Archives of the Chicago Institute for Psychoanalysis In this volume From the Kohut Archives features a selection of previously unpublished Kohut correspondence from the 1940s through the 1970s The clinical papers that follow are divided into sections dealing with Transference and Countertransference Selfobjects and Objects and Schizoid and Psychotic Patients As Howard Bacal explains in his introduction these papers bear witness to the way in which self psychology has increasingly become a relational self psychology a psychology of the individual's experience in the context of relatedness Coburn's reconstruction of countertransference as an experience of self injury in the wake of unresponsiveness to the analyst's own selfobject needs Livingston's demonstration of the ways in which dreams can be used to facilitate a playful and metaphorical communication between analyst and patient Gorney's examination of twinship experience as a fundamental goal of analytic technique and Lenoff's emphasis on the relational aspects of phantasy selfobject experience are among the highlights of the collection Enlarged by contemporary perspectives on gender and self experience and a critical examination of Kohut Loewald and the Postmoderns Volume 14 reaffirms the position of self psychology at the forefront of clinical developmental and conceptual advance Progress in Self Psychology, V. 18 Arnold I. Goldberg, 2013-06-17 Postmodern Self Psychology the last volume of the Progress in Self Psychology series under the editorship of Arnold Goldberg charts the path of self psychology into the postmodern era of psychoanalysis It begins with Goldberg's thoughtful consideration of the several tributaries of self psychological thought in the decades after Kohut and continues with Mark Gehrie's elaboration of reflective realism as a self psychological way out of epistemological quagmires about the essential reality of the analytic endeavor Clinical contributions offer contemporary perspectives on clinical themes that engaged Kohut in the 1970s a study of the effect of moments of meeting on systems of pathological accommodation a reappraisal of empathy as a bi-directional negation and an assessment of the diverse clinical phenomena that justify a prolonged understanding only phase of treatment The theory section of Volume 18 comparably charts the movement of self psychology toward a postmodern sensibility Contributors reappraise intersubjectivity theory as a contextualist treatment approach consistent with dynamic systems theory return to Kohut's concept of selfobject relationships with special attention to the separate subjective and intersubjective components of selfobject experiences and develop one of Kohut's early ideas into a theory of forward edge transferences that strengthen normal self development In all Volume 18 is a richly insightful progress report on the current status of self psychology and a fitting capstone to Arnold Goldberg's distinguished tenure as editor of the Progress in Self Psychology series *Progress in Self Psychology, V. 16* Arnold I. Goldberg, 2013-06-17 Volume 16 of Progress in Self Psychology How Responsive Should We

Be illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post Kohutian intersubjectivists concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy subjectivity and authenticity Responses to the tension encompass the stance of intersubjective contextualism advocacy of active responsiveness and emphasis on the thorough going bidirectionality of the analytic endeavor Balancing these perspectives are a reprise on Kohut's concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self state regulation and address the self reparative functions that inhere in the act of dreaming Like previous volumes in the series volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations Here self psychology is brought to bear on psychotherapy with placed children on work with adults with nonverbal learning disabilities and on brief therapy Rector's examination of twinship and religious experience Hagman's elucidation of the creative process and Siegel and Topel's experiment with supervision via the internet exemplify the ever expanding explanatory range of self psychological insights

Progress in Self Psychology, V. 12 Arnold I. Goldberg, 2013-06-17 Volume 12 of the Progress in Self Psychology series begins with reassessments of frustration and responsiveness optimal and otherwise by MacIsaac Bacal and Thomson the Shanes and Doctors The philosophical dimension of self psychology is addressed by Riker who looks at Kohut's bipolar theory of the self and Kriegman who examines the subjectivism objectivism dialectic in self psychology from the standpoint of evolutionary biology Clinical studies focus on self and mutual regulation in relation to therapeutic action countertransference and the curative process and the consequences of the negative selfobject in early character formation A separate section of child studies includes a case study exemplifying a self psychological approach to child therapy and an examination of pathological adaptation to childhood parent loss With a concluding section of richly varied studies in applied self psychology Basic Ideas Reconsidered promises to be basic reading for all students of contemporary self psychology
