This workshop on Protocols for High Speed Networks is the seventh in a successful series of international workshops well known for their small and focused target audience that provide a sound basis for intensive discussions of high quality and timely research work. The location of the workshop has alternated between Europe and the United States at venues not only worth visiting for the workshop but also for the distinct impressions they leave on the participants. The first workshop was held in 1989 in Zurich. Subsequently, the workshop was moved to Palo Alto 1990, Stockholm 1993, Vancouver 1994, Sophia Antipolis, Nice 1996 and Salem 1999. In 2002 the workshop was hosted in Berlin, the capital of Germany. PfHSN is a workshop providing an international forum that focuses on issues related to high speed networking such as protocols, implementation techniques, router design, network processors and the like. Although the topics have shifted during the last couple of years, for example from parallel protocol implementations to network processors, it could be observed that high speed remains a very important issue with respect to future networking. Traditionally, PfHSN is a relatively focused and small workshop with an audience of about 60 participants. **Encyclopedia of Multimedia Technology and Networking** Pagani, Margherita, 2005-05-30. This encyclopedia offers a comprehensive knowledge of multimedia information technology from an economic and technological perspective. Provided by publisher. *Handbook on Parallel and Distributed Processing* Jacek Blazewicz, Klaus Ecker, Brigitte Plateau, Denis Trystram, 2013-03-09. In this volume, authors of academia and practice provide practitioners, scientists and graduate students with a good overview of basic methods and paradigms as well as important issues and trends across the broad spectrum of parallel and distributed processing. In particular, the book covers fundamental topics such as efficient parallel algorithms, languages for parallel processing, parallel operating systems, architecture of parallel and distributed systems, management of resources, tools for parallel computing, parallel database systems and multimedia object servers and networking aspects of distributed and parallel computing. Three chapters are dedicated to applications: parallel and distributed scientific computing, high performance computing in molecular sciences and multimedia applications for parallel and distributed systems. Summing up, the Handbook is indispensable for academics and professionals who are interested in learning the leading expert's view of the topic. Network World, 1993-02-01. For
